

SPRING EQUINOX

INFORMATIONAL PASSAGE

WITH COMPREHENSION QUESTIONS

GRADE 3

Have you ever noticed that the days start getting longer and warmer after winter? This happens because of the Spring Equinox! The word "equinox" means "equal night," and on this special day, daytime and nighttime are almost the same length. The Spring Equinox happens every year around March 20th or 21st in the Northern Hemisphere and marks the first day of spring!

The Earth moves around the sun in a path called an orbit. At different times of the year, parts of the Earth get more sunlight than others. During the winter, the days are short, and the nights are long. But when the Spring Equinox arrives, the sun shines directly over the equator, making day and night almost equal. After this, the days keep getting longer and warmer until summer.

Many people celebrate the Spring Equinox in different ways. Some visit special places, like Stonehenge, to watch the sun rise. Others plant flowers, go for a walk, or take part in festivals that welcome the new season. It's a time to say goodbye to the cold winter and hello to the warmth and beauty of spring!
