**Practicing Theory in Second Language Writing** Tony Silva, Paul Kei Matsuda, 2010-01-15 Theory has been used widely in the field of second language writing. Second language writing specialists, teachers, researchers, and administrators have yet to have an open and sustained conversation about what theory is, how it works, and more important, how to practice theory. *Practicing Theory in Second Language Writing* features fourteen essays by distinguished scholars in second language writing who explore various aspects of theoretical work that goes on in the field.

*The Strong Sylow Theorem for the Prime  $p$  in Simple Locally Finite Groups* Dipl.-Math. Felix F. Flemisch, 2024-04-10 This research paper continues 15. We begin with giving a profound overview of the structure of arbitrary simple groups and in particular of the simple locally finite groups and reduce their Sylow theory for the prime  $p$  to a quite famous conjecture by Prof. Otto H. Kegel (see 37 Theorem 2.4). Let the  $p$ -subgroup  $P$  be a  $p$ -uniqueness subgroup in the finite simple group  $S$  which belongs to one of the seven rank unbounded families. Then the rank of  $S$  is bounded in terms of  $P$  about the rank unbounded ones of the 19 known families of finite simple groups. We introduce a new scheme to describe the 19 families; the family  $T$  of types defines the rank of each type and emphasises the role of Kegel's conjecture. This part presents a unified picture of known results whose proofs are by reference. Subsequently, we apply new ideas to prove the conjecture for the alternating groups. Thereupon, we are remembering Kegel's conjecture and sequences. Next, we suggest a way 1 and a way 2 how to prove and even how to optimise Kegel's conjecture step by step or *peu peu* which leads to Conjecture 1, Conjecture 2, and Conjecture 3, thereby unifying Sylow theory in locally finite simple groups with Sylow theory in locally finite and  $p$ -soluble groups whose joint study directs Sylow theory in locally finite groups. For any unexplained terminology, we refer to 15. We then continue the program begun above to optimise along the way 1 the theorem about the first type  $A_n$  of infinite families of finite simple groups step by step to further types by proving it for the second type  $A_{PSL_n}$ . We start with proving Conjecture 2 about the General Linear Groups over commutative locally finite fields, stating that their rank is bounded in terms of their  $p$ -uniqueness and then break down this insight to the Special Linear Groups and the Projective Special Linear  $PSL$  Groups over locally finite fields. We close with suggestions for future research regarding the remaining rank unbounded types: the Classical Groups and the way 2 regarding locally finite and  $p$ -soluble groups and regarding Cauchy's and Galois' contributions to Sylow theory in finite groups. We much hope to enthuse group theorists with them. We include the predecessor research paper 15 as an Appendix.
