Needles, Marian Powers, 2002 Principles of Financial Accounting offers balanced flexible content supported by an array of truly integrated print and technology supplements. Whether an instructor wants to present a user or procedural orientation, incorporate new instructional strategies, develop students' core skills and competencies or integrate technology into the classroom, the 2002e edition provides a total solution. This text, intended for use in a single semester or one quarter course, assumes no previous training in accounting or business and is appropriate for both majors and non-majors. Principles of Financial Accounting is designed for financial accounting programs that prefer to start with a sole proprietorship approach and move at a slower pace than a corporate financial accounting course. New Blackboard Course Cartridges and WebCT ePacks deliver course content over the Internet and can be used in a traditional classroom setting or as a complete distance learning solution. Customized course materials include reviews, quizzes, activities, solutions, PowerPoint slides and more. New Teaching Accounting Online, an interactive Web-based workshop, allows faculty to design and deliver online accounting courses. New Discussion and assignment materials include more financial statements and excerpts from real company reports to promote decision making through the use of real world financial information. New An increased focus on cash flow throughout the text highlights the effect of business activities on cash flow. New Focus on Business boxes emphasize business strategy as it relates to the key themes of ethics, practice, technology and international issues. Each box provides insights into real companies, including start-ups and e-commerce businesses. New Decision Points, based on excerpts from annual reports and business journals, promote critical thinking and decision making by presenting students with a situation that requires them to make a decision using accounting information. Decision Points in the financial chapters are presented from A User's Focus, while the Decision Points in the managerial chapters provide A Manager's Focus. New In most chapters, the opening Learning Objective highlights the focus on management by exploring how managers use accounting information to make decisions. New The text examines performance measurement by integrating the concept of using financial information in performance evaluation. New An annotated Chapter 1 helps students understand the purpose and value of the book's pedagogical framework and how to use it to their advantage.
