Related Questions

This lesson contains questions that align with standards for which you might see some different interpretations that some systems standards. Examples of variations are highlighted (see link).

This lesson explains how engineering design provides a method by which designers create specified parts and assemblies that are not perfect but are good enough to function properly.

In this activity, you will use engineering drawings to identify tolerance, dimension, and geometric tolerance and understand tolerance indicators making parts of a product.

Procedure

- Study the three drawings below to identify specified tolerances.
 - Each tolerance is marked with a tolerance label: A through E.
 - Identify the type of tolerance in each highlighted example by labeling each tolerance dimension with one of the following: *dimensional tolerance*, *geometric tolerance*, or *feature control*.
 - Include the tolerance and the upper and lower limit for each.
