Esta diversidad puede justificarse como un caso de regionalismos de países diferentes, pero bien en el segundo ejemplo el mismo técnico argentino en la provincia de Buenos Aires hablaría de chavetas para frenar un buque en mientras que otro técnico argentino en Córdoba hablaría de cupillas para frenar un buque. En paralelo se puede ver también que los diferentes fabricantes tienen términos específicos con respecto a sus productos, por ejemplo uno de los más conocidos fabricantes británicos de motores posee un sistema propio de términos de denominación y aplicación de Boletines de Servicio no mandatorios muy distinto al que manejan sus competidores directos de Estados Unidos y Canadá. Por eso la intención de este manual es contemplar una cantidad importante de tales divergencias presentando las en cada asiento específico para que el uso del término y el concepto se apliquen con la mayor propiedad posible. La propuesta de este manual es constituirse en una obra de referencia pensada como apoyo idiártico para interpretar y utilizar con mayor exactitud todos los niveles en que se presenta la terminología aeronáutica y contribuir a la aclaración de las dudas que continuamente se dan en la traducción de ambas lenguas en los diferentes campos de la aviación.

In the Event of a Water Landing Michael G. Walling, 2010

In the Event of a Water Landing At 8:15 A.M. on October 14, 1947, Chuck Martin, the 26-year-old pilot of the Boeing 314 flying boat named *Bermuda Sky Queen*, attempted to do what had never been done before: land an 88,000-pound aircraft in thirty-five-foot-high seas. The lives of sixty-eight passengers and crew on board depended on his ability. A mile away was the 327-foot US Coast Guard Cutter *George M. Bibb*. The cutter's crew watched as the plane descended. If *Sky Queen* survived the landing, getting the passengers to safety would be their job. Nine years later and half a world away, Captain Richard Ogg, flying the Pan American Airways *Stratocruiser Sovereign of the Skies*, was forced to ditch the aircraft along with its forty-three passengers and crew. The Coast Guard was nearby. Manning Ocean Station November was the US Coast Guard Cutter *Pontchartrain*. Once more, rescuing the survivors would be in their hands.

In the Event of a Water Landing tells for the first time the full stories of the *Bermuda Sky Queen* and *Sovereign of the Skies*, rescues the only two completely successful open-ocean ditchings in Commercial Aviation history. These two stories encompass many facets of ditchings: bad weather, engine failure, horrific sea conditions, and indomitable courage in the face of death. Between these two are tales of other ditchings, as well as the journey we humans have undertaken from the beginning of transoceanic flight to today. Using the voices of passengers, flight crew, and those who rescued them, an amazing tale unfolds. Their vivid memories interspersed with contemporary news reports serve to flesh out the unemotional entries from official investigations. These ditchings and rescues embody the hopes, fears, and courage of people facing death hundreds of miles from land and the audacity of the men who risked their own lives to save them.
