A3 Calendar Template 2014

Brian Henderson

A3 Calendar Template 2014:

Moonlighting Proteins Brian Henderson, 2017-04-17 Moonlighting Proteins Novel Virulence Factors in Bacterial Infections is a complete examination of the ways in which proteins with more than one unique biological action are able to serve as virulence factors in different bacteria. The book explores the pathogenicity of bacterial moonlighting proteins demonstrating the plasticity of protein evolution as it relates to protein function and to bacterial communication. Highlighting the latest discoveries in the field, it details the approximately 70 known bacterial proteins with a moonlighting function related to a virulence phenomenon. Chapters describe the ways in which each moonlighting protein can function as such for a variety of bacterial pathogens and how individual bacteria can use more than one moonlighting protein as a virulence factor. The cutting edge research contained here offers important insights into many topics from bacterial colonization, virulence, and antibiotic resistance to protein structure and the therapeutic potential of moonlighting proteins. Moonlighting Proteins: Novel Virulence Factors in Bacterial Infections will be of interest to researchers and graduate students in microbiology, specifically bacteriology, immunology, cell and molecular biology, biochemistry, pathology, and protein science.
