*A River Flows Through It* Selina Ho, 2020-12-17 *A River Flows Through It* A Comparative Study of Transboundary Water Disputes and Cooperation in Asia explores water disputes in Asia and addresses the question of how states sharing a river system can be incentivized to cooperate Water scarcity is a major environmental societal and economic problem around the world Increasing demand for water as a result of rapid economic development high population growth and density has depleted the world's water resources leading to floods droughts environmental disasters and societal displacement Shared river basins are therefore often a source of tension and conflict between states In regions where relations between countries have historically been conflictual scarce river water resources have exacerbated tensions and have even sparked wars Yet more often than not states sharing a river basin are able to come to some form of agreement whether they are far reaching ones such as water sharing agreements or those that are more limited such as the sharing of hydrological data Why do riparian states cooperate especially when power asymmetries between upstream and downstream countries are characteristic of transboundary river basins How do non state actors affect the management of international rivers What are the conditions that facilitate or hinder cooperation This book wrestles with these questions by exploring water disputes and cooperation in the major river systems in Asia and by comparing them with cases in Africa Europe and the United States This book will be of great value to scholars students and policymakers interested in transboundary water disputes and cooperation hydro diplomacy and river activism It was originally published as special issues of *Water International* **A River Runs Through It, and Other Stories** Norman Maclean, 1989 [The Klondike Official Guide](#) William Ogilvie, 1898
