**A Critical Introduction to Translation Studies** Jean Boase-Beier,2011-04-07 Jean Boase Beier s Critical Introduction To Translation Studies demonstrates a keen understanding

of theoretical and practical translation It looks to instances where translation might not be straightforward where stylistics play an important role Examples are discussed from works of literature advertisements journalism and others where effects on the reader are central to the text and are reflected in the style It begins by setting out some of the basic problems and issues that arise in the study of translation such as the difference between literary and non literary translation the role of language content and style the question of universals and specifics in language and the notion of context The book then goes on to focus more closely on style and how it enables us to characterise literary texts and literary translation The final part looks at the translation of poetry Throughout it is conscious of the relationship between theory and practice in translation This book offers a new approach to translation grounded in stylistics and it will be an invaluable resource for undergraduates and postgraduates approaching translation studies    **The Athenaeum** ,1887    The academy ,1881    **Text book of documentary Chinese, with a vocabulary, for the special use of the Chinese Customs Service** Friedrich Hirth,1885
