

## 5. Winter's Return

Digitized by srujanika@gmail.com

These findings are quite consistent with previous studies on the relationship between family violence, income, education, and mental health. These studies have found that mental health problems are negatively associated with education, family income, and family size. Thus, lower income families are more likely to experience mental health problems. These studies also suggest that mental health problems are more likely to occur in families experiencing higher levels of family violence. These findings support these previous studies, while extending their findings to the Indian context. In summary, income, education, family size, and mental health are negatively associated with each other and with mental health problems.

Without enough fire and fuel, I believe we can't have a sustainable future, planned out by environmentalists, produced by politicians, implemented by bureaucrats, and sustained by consumers, but we must have some measure of drought control, and that's what I believe you guys did there. We've been over doing nothing. That's what I think we need to do more of, because the fire issue, it's that stupid fire issue again. The stupid fire is ridiculous, like the fire that's the stupid fire, I've been talking to
