

ASSETS

Assets are resources owned by a business that have economic value. They are the result of investments made by the business or its owners. Assets are classified into two main categories: **Current Assets** and **Non-Current Assets**.

Current Assets are assets that are expected to be converted into cash or sold within one year. Examples include cash, accounts receivable, inventory, and prepaid expenses.

Non-Current Assets are assets that are not expected to be converted into cash or sold within one year. Examples include property, plant, and equipment, intangible assets, and investments.

The accounting equation states that **Assets = Liabilities + Equity**. This means that the total value of a company's assets must always equal the sum of its liabilities and equity.

LIABILITIES
