[Hear Me Roar](#) Erna Walraven,2025-04-29 In the early 1980s when Erna Walraven decided to follow her dreams and become one of the first female zookeepers in Australia she thought her biggest challenges would be feeding big cats and subduing irate gorillas In fact it was her male colleagues who made work miserable harassing and humiliating her for doing a man s job So she looked to the animals under her care to prove them wrong Despite what Erna s colleagues seemed to think the females of the animal world were far from weak and demure Elephant matriarchs led their herds female bonobos revelled in sexual exploration emu mothers abandoned their chicks to the care of their fathers Her colleagues wouldn t dare tell a female tiger that hunting was a male s job why were they so intent on limiting Erna In this insightful and delightful book Erna blends memoir and pop science to tell a fiercely female story She recounts a life spent caring for animals in a fast transforming industry and dives into scientific evidence and evolutionary history to debunk the myths that once held her back

[Governing for Revolution](#) Megan Stewart,2021-03-18 For some rebel groups governance is not always part of a military strategy but a necessary element of realizing revolution through civil war

In Fraud We Trust Wes Henricksen,2024-11-15 Telling lies and falling for them is one of the things that makes us human The vast majority of these falsehoods are harmless and perfectly legal But when someone deceives another for material gain or profit inflicting injury in the process we give this kind of lie a special label fraud Most people are familiar with the concept and understand that fraud is prohibited by law What many fail to appreciate however is that the law does not treat all frauds equally If you defraud an individual you might end up in prison On the other hand if you defraud millions of people what Wes Henricksen calls fraud on the public you might end up wealthy or powerful or even get elected president In a perverse sense the bigger the fraud the more likely it is protected by the First Amendment and therefore legal As a result many of the largest and most destructive fraud schemes are allowed encouraged and richly rewarded Examples of fraud on the public are everywhere The fossil fuel industry long used PR firms and lobbyists to spread disinformation about oil s role in climate change Sugar companies misled the public about the dangers of high fructose corn syrup redirecting the public s attention to fat Cigarette manufacturers famously lied about the risks of tobacco and opioid makers lied about the effects of the drug

Social media influencers and fringe media outlets promoted false claims about the COVID 19 pandemic being a government hoax. Others claimed that vaccines were part of a sinister plot. Politicians on both sides of the aisle lie with such regularity that people have become deeply cynical about whether to believe anything they say. Henricksen shows that large scale fraud is carried out for many reasons beyond financial profit including political gain, the prevention of justice and the falsification of history. In addition to exposing the depths of the problem, Henricksen gives readers a way forward. He proposes we call these massive deceit campaigns by their proper name: that we de-weaponize the First Amendment which was never meant to shield swindlers and that we enact new laws that protect the public from fraud. By revealing for the first time the root legal cause of the misinformation crisis and presenting novel solutions, *In Fraud We Trust* speaks to the present moment as it offers answers for the future.

Keeping Those Words in Mind Max Louwerse, 2021-07-15

How can humans keep thousands of words in mind and have no difficulty understanding trillions of sentences? The answer to this question might lie in parents teaching their children language skills or in the human brain which may be equipped with a language instinct or maybe in impressive memory skills that link words to their perceptual information. Undoubtedly there is some truth to some of these explanations. But one answer, perhaps the most important answer, has been largely ignored. *Keeping Those Words in Mind* tries to remedy this oversight. Linguist and cognitive psychologist Max Louwerse PhD argues that understanding language is not just possible because of memory, brain environment and computation but because of the patterns in the sequence of sounds and words themselves. He demonstrates that what seems to be an arbitrary communication system with arbitrary characters and sounds that become words and arbitrary meanings for those words actually is a well-organized system that has evolved over tens of thousands of years to make communication as efficient as it is. What is needed for humans to acquire language is for humans to recognize and discover the patterns in our communication system. By examining how our brains process language and find patterns, the intricacies of the language system itself and even scientific breakthroughs in computer science and artificial intelligence, *Keeping Those Words in Mind* brings a brand new and interdisciplinary explanation for our ability to extract meaning from language.

The Great Apes Chris Herzfeld, 2017-11-14

A unique, beautifully illustrated exploration of our fascination with our closest primate relatives and the development of primatology as a discipline. This insightful work is a compact but wide-ranging survey of humankind's relationship to the great apes: chimpanzees, bonobos, gorillas, orangutans. From antiquity to the present, replete with fascinating historical details and anecdotes, it traces twists and turns in our construction of primate knowledge over five hundred years. Chris Herzfeld outlines the development of primatology and its key players and events, including well-known long-term field studies, notably the pioneering work by women such as Jane Goodall, Dian Fossey and Biruté Galdikas. Herzfeld seeks to heighten our understanding of great apes and the many ways they are like us. The reader will encounter apes living in human families.
