2014 Geography SI Paper:

Fostering Transformative Research in the Geographical Sciences National Academies of Sciences, Engineering, and Medicine, Division on Earth and Life Studies, Board on Earth Sciences and Resources, Geographical Sciences Committee, Committee on Identifying Transformative Research in the Geographical Sciences, 2019-04-22 The central purpose of all research is to create new knowledge. In the geographical sciences this is driven by a desire to create new knowledge about the relations between space, place, and the anthropogenic and non-anthropogenic features and processes of the Earth. But some research goes beyond these modest aims and creates new opportunities for further research or affects the process of knowledge acquisition more broadly or changes the way other researchers in a domain think about the world and go about their business. Due to its positive impacts, transformative research can be regarded as inherently having greater value than more conventional research and funding agencies clearly regard transformative research as something to be encouraged and funded through special programs. Assessments of transformative research funding initiatives are few and provide a mixed picture of their effectiveness. The challenge is whether transformative research can be identified at the time it is proposed rather than after it has been conducted, communicated, and its influence on the discipline has become clear.

Fostering Transformative Research in the Geographical Sciences reviews how transformative research has emerged in the past, what its early markers were, and makes recommendations for how it can be nurtured in the future. **Global Health and Geographical Imaginaries** Clare Herrick, David Reubi, 2017-03-16 To date, geography has not yet carved out a disciplinary niche within the diffuse domain that constitutes global health. However, the compulsion to do and understand global health emerges largely from contexts that geography has long engaged with: urbanisation, globalisation, political economy, risk, vulnerability, lifestyles, geopolitics, culture, governance, development, and the environment. Moreover, global health brings with it an innate, powerful, and politicising spatial logic that is only now starting to emerge as an object of enquiry. This book aims to draw attention to and showcase the wealth of existing and emergent geographical contributions to what has recently been termed critical global health studies. Geographical perspectives, this collection argues, are essential to bringing new and critical perspectives to bear on the inherent complexities and interconnectedness of global health problems and purported solutions. Thus, rather than rehearsing the frequent critique that global health is more a set of problems than a coherent disciplinary approach to ameliorating the health of all and redressing global bio-inequalities, this collection seeks to explore what these problems might represent and the geographical imaginaries inherent in their constitution. This unique volume of geographical writings on global health not only deepens social scientific engagements with health itself but, in so doing, brings forth a series of new conceptual, methodological, and empirical contributions to social scientific multidisciplinary scholarship. **Handbook of Research Methods and Applications in Environmental Studies** Matthias Ruth, 2015-08-28 This Handbook presents methods to advance the understanding of interdependencies between the well-being of human societies and the performance

of their biophysical environment It showcases applications to material and energy use urbanization and tech *The European Union and the Geopolitics of the Arctic* Andreas Raspotnik,2018-01-26 The Arctic is a region that has seen exponential growth as a space of geopolitical interest over the past decade This insightful book is the first to analyse the European Union s Arctic policy endeavours of the early 21st Century from a critical geopolitical perspective *Regional Research Frontiers - Vol. 1* Randall Jackson,Peter Schaeffer,2017-04-17 This volume focuses on frontiers in regional research and identifies trends and future developments in the areas of innovation regional growth and migration It also addresses topics such as mobility regional forecasting and regional policy and includes expert contributions on disasters resilience and sustainability Building on recent methodological and modelling advances as well as on extensive policy analysis experience top international regional scientists identify and evaluate emerging new conceptual and methodological trends and directions in regional research This book will appeal to a wide readership from regional scientists and economists to geographers quantitatively oriented regional planners and other related disciplines It offers a source of relevant information for academic researchers and policy analysts in government and is also suitable for advanced teaching courses on regional and spatial science economics and political science **Research Ethics in Human Geography** Sebastian Henn,Judith Miggelbrink,Kathrin Hörschelmann,2021-10-25 This book explores common ethical issues faced by human geographers in their research It offers practical guidance for research planning and design that incorporates geographic disciplinary knowledge to conceptualise research ethics The volume brings together international insights from researchers in geography and related fields to provide a comprehensive overview of relevant ethical frameworks and challenges in human geography research It includes in depth reflections on a range of ethical dilemmas that arise in certain contextual conditions and spatial constructions that face those researching and teaching on spatial dimensions of social life With a focus on the increased need for specialist ethics training as part of postgraduate education in the Humanities and Social Sciences and the necessity for fostering sensitivity in cross cultural comparative research the book seeks to enable people to engage in ethical decision making and moral reasoning while conducting research Chapters examine the implications of geographical research for conceptualising ethics and discuss specific case studies from which more general conclusions linked to conceptual debates are drawn As a research based reference guide for tackling ethically sensitive projects and international differences in legal and institutional standards and requirements the book is useful for postgraduate and undergraduate students as well as academics teaching at senior levels

Soon Singh Bikar Singh,2019 **Global Software Engineering** Gamel O. Wiresdu,2019-06-18 Technology and organizations co evolve as is illustrated by the growth of information and communication technology ICT and global software engineering GSE Technology has enabled the development of innovations in GSE The literature on GSE has emphasized the role of the organization at the expense of technology This book explores the role of technology in the evolution of globally distributed software engineering To date the role of the organization has been examined in coordinating GSE activities because of the prevalence of the logic of rationality i e the efficiency ethos mechanical methods and mathematical analysis and

indeterminacy i.e. the effectiveness ethos natural methods and functional analysis. This logic neglects the coordination role of ICT. However, GSE itself is an organizational mode that is technology begotten technology dominated and technology driven as is its coordination. GSE is a direct reflection of ICT innovation, change and use yet research into the role of technology of GSE has been neglected. Global Software Engineering Virtualization and Coordination considers existing fragmented explanations and perspectives in GSE research poses new questions about GSE and proposes a framework based on the logic of virtuality i.e. creativity, ethos, electrical methods and technological analysis rather than of rationality and indeterminacy. Virtuality is the primary perspective in this book's comprehensive study of GSE. The book concludes with an integrated explanation of GSE coordination made possible through ICT connectivity and capitalization.

Yearbook of International Organizations

This volume also includes a research bibliography on international organizations and transnational associations.

Teaching Sustainability

Wendy Petersen Boring, William Forbes, William Forbes (Professor of geography), 2013. American colleges and universities have been relatively quick to address the challenge of sustainability in operations. Ironically, they have been slower to respond in regard to their core mission educating students. Teaching sustainability aims to redress this shortcoming by opening doors to education for sustainability in the humanities and social sciences. The essays in this collection are richly diverse. They investigate ways sustainability education pushes back against traditional disciplines while it simultaneously benefits from the perspectives and skills these fields have to offer. They also address big questions such as how to make education meaningful, how to examine hidden assumptions underlying current curricula and how a focus on sustainability can answer critics of contemporary higher education. The heart of teaching sustainability is reflection and advice on pedagogy. From these richly diverse case studies, important common themes emerge: the symbiotic relationship between classroom and campus operations, techniques for transforming the campus itself from merely a setting to a learning laboratory and the potential of community partners for teaching sense of place. An equally significant theme is the overlap between sustainability education and emerging best practice in pedagogy. Essays on theory and practice, individual and collaborative projects, service learning and consequential activities all exemplify how sustainability and deep learning go hand in hand. Like sustainability itself, the volume infuses

theory with practical application The contributors demonstrate the ways in which a single course can serve as a powerful change agent for an entire campus how to build bridges between faculty and administrators and even how to move forward on modest budgets The authors themselves constitute a network of advisors Publisher s description **Urbanization and Development** ,2016 The analysis of urban development of the past twenty years presented in this maiden edition of the World Cities Report shows with compelling evidence that there are new forms of collaboration and cooperation planning governance finance and learning that can sustain positive change The Report unequivocally demonstrates that the current urbanization model is unsustainable in many respects It conveys a clear message that the pattern of urbanization needs to change in order to better respond to the challenges of our time to address issues such as inequality climate change informality insecurity and the unsustainable forms of urban expansion *National Union Catalog, 1980* ,1981 **An**
