The approach where teachers make Overall Teacher Judgements based on a range of assessment tools and their own observations rather than using any particular national test has created predictable problems with moderation within and across schools. It has been claimed that this bold Kiwi Standards approach avoids the narrowed curriculum and mediocre outcomes of high stakes assessment in other countries. Yet this book suggests it just produces another variant of the same problems and demonstrates that even a relatively weak high stakes assessment approach still produces

performative effects The book provides a blow by blow account of the development of a policy including the continuous repositioning of New Zealand's Government as it has sought to justify the policy in the face of opposition from educators Indeed the Kiwi Standards tale provides a world class example of teachers fighting back against policy with the help of academics There is an indigenous M̄ori aspect to the story as well Finally this book also provides comparative international perspectives including responses from well known US English and Australian academics *Environmental Security and India* Satabdi Das, 2022-08-26 This book examines environmental issues through the lens of security studies and presents a comprehensive analysis of Indian policy in dealing with threats posed by climate change This book Puts forward theoretical base for securitization of environmental issues incorporating different schools of thought Presents a survey of global environmental politics in general and the effects of climate change and its consequences for India's national security in particular Examines the politics involved in India's environmental policy at both the domestic and international levels Outlines key policy takeaways and possibilities for action that can help contain the threat of environmental change A comprehensive guide to a new and emerging dimension in Indian security policy this book will be essential reading for students and researchers of international relations security studies especially non traditional security public policy especially environmental policy and area studies

The Schenley Experiment Jake Oresick, 2017-04-14 The Schenley Experiment is the story of Pittsburgh's first public high school a social incubator in a largely segregated city that was highly even improbably successful throughout its 156 year existence Established in 1855 as Central High School and reorganized in 1916 Schenley High School was a model of innovative public education and an ongoing experiment in diversity Its graduates include Andy Warhol actor Bill Nunn and jazz virtuoso Earl Hines and its prestigious academic program and pensions lured such teachers as future Pulitzer Prize winner Willa Cather The subject of investment as well as destructive neglect the school reflects the history of the city of Pittsburgh and provides a study in both the best and worst of urban public education practices there and across the Rust Belt Integrated decades before Brown v Board of Education Schenley succumbed to default segregation during the white flight of the 1970s it rose again to prominence in the late 1980s when parents camped out in six day long lines to enroll their children in visionary superintendent Richard C Wallace's reinvigorated school Although the historic triangular building was a cornerstone of its North Oakland neighborhood and a showpiece for the city of Pittsburgh officials closed the school in 2008 citing over 50 million in necessary renovations a controversial event that captured national attention Schenley alumnus Jake Oresick tells this story through interviews historical documents and hundreds of first person accounts drawn from a community indelibly tied to the school A memorable important work of local and educational history his book is a case study of desegregation magnet education and the changing nature and legacies of America's oldest public schools
