History of Romanian Technology and Industry Dorel Banabic,2023-09-21 This volume showcases the valuable
achievements of the Romanian technology and industry worldwide It started from the premise that the history of Romanian
technique is scarcely known outside the borders of Romania The main Romanian contributions to the world s technological
heritage are missing except for a few names in the field of aviation from the great encyclopedias and dictionaries published
worldwide This is due among other reasons to the insufficient promotion in widely spoken languages of the history of
Romanian technology The multidisciplinary approach of the volumes means that the field of technology had to be split into
several branches The present volume includes the following industries electrical engineering energy technology biomedicine
maritime and rail transport automotive industry aviation The history of engineering societies of engineering education of
intellectual property and of inventions as well as a synopsis of the personalities of Romanian engineering have been tackled
in separate chapters For each field are engaged the collaboration of authors who have already published a history of their
field Certain chapters were drafted with the aid of specialists who have played the part of policy makers in the elaboration of
development strategies for Romania and who are familiar not only with the facts and the history of their field but also with
the philosophy behind its development Lemon-Aid New and Used Cars and Trucks 2007-2017 Phil Edmonston,2017-03-11
