2014 Geography Paper 2 September:

Handbook of Urban Geography Tim Schwanen, Ronald van Kempen, 2019 This collection brings together the latest thinking in urban geography. It provides a comprehensive overview of topical issues and draws on experiences from across the world. Chapters have been prepared by leading researchers in the field and cover themes as diverse as urban economies, inequalities and diversity, conflicts and politics, ecology and sustainability, and information technologies. The Handbook offers a valuable resource for students and researchers interested in cities and the urban in geography and across the wider social sciences.

Atlas of Religion in China: Social and Geographical Contexts Fenggang Yang, 2018-09-04 The speed and the scale with which traditional religions in China have been revived and new spiritual movements have emerged in recent decades make it difficult for scholars to stay up to date on the religious transformations within Chinese society. This unique atlas presents a bird's eye view of the religious landscape in China today. In more than 150 full color maps and six different case studies it maps the officially registered venues of China's major religions: Buddhism, Christianity, Protestant and Catholic, Daoism and Islam at the national, provincial and county levels. The atlas also outlines the contours of Confucianism, folk religion and the Mao cult. Further it describes the main organizations, beliefs and rituals of China's main religions as well as the social and demographic characteristics of their respective believers. Putting multiple religions side by side in their contexts this atlas deploys the latest qualitative, quantitative and spatial data acquired from censuses, surveys and fieldwork to offer a definitive overview of religion in contemporary China. An essential resource for all scholars and students of religion and society in China.

Regional Products and Rural Livelihoods N. Lalitha, Soumya Vinayan, 2019-01-04 In the realm of trade there exists a long tradition of labelling products with the emphasis on their place of origin to convey their quality. These products with Geographical Indications (GIs) tag in the parlance of intellectual property rights indicate the link between the geographic location and the product and represent the collective rights of the territory specific communities that are engaged in the production of that commodity. With its entry into the World Trade Organization India has implemented GI within a legal framework. Through select case studies of products like textiles and crafts in South India *Regional Products and Rural Livelihoods* looks at the ramifications of GI implementation at macro and micro levels. It explores the involvement of stakeholders with respect to the reputation of a place, community and the institutional challenges that emerge in the process of GI implementation. This volume highlights the need for collective action by stakeholders to actualize economic gains through GI and analyses its possible outcomes such as improved livelihoods for producers and authentic products for the consumers.

Atlas of Knowledge Katy Borner, 2015-03-20 The power of mapping principles for visualizing knowledge is illustrated by many stunning large scale full color maps. Maps of physical spaces locate us in the world and help us navigate unfamiliar routes. Maps of topical spaces help us visualize the extent and structure of our collective knowledge. They reveal bursts of activity, pathways of ideas and borders that beg to be crossed. This book from the author of *Atlas of Science*

describes the power of topical maps providing readers with principles for visualizing knowledge and offering as examples forty large scale and more than 100 small scale full color maps Today data literacy is becoming as important as language literacy Well designed visualizations can rescue us from a sea of data helping us to make sense of information connect ideas and make better decisions in real time In *Atlas of Knowledge* leading visualization expert Katy Börner makes the case for a systems science approach to science and technology studies and explains different types and levels of analysis Drawing on fifteen years of teaching and tool development she introduces a theoretical framework meant to guide readers through user and task analysis data preparation analysis and visualization visualization deployment and the interpretation of science maps To exemplify the framework the *Atlas* features striking and enlightening new maps from the popular *Places Spaces Mapping Science* exhibit that range from Key Events in the Development of the Video Tape Recorder to Mobile Landscapes Location Data from Cell Phones for Urban Analysis to Literary Empires Mapping Temporal and Spatial Settings of Victorian Poetry to Seeing Standards A Visualization of the Metadata Universe She also discusses the possible effect of science maps on the practice of science
