An Engineer Imagines:

An Engineer Imagines Peter Rice, 2024-03-14 The long awaited reissue of the autobiography of Peter Rice one of the main structural engineers behind the Sydney Opera House the Pompidou Centre the Menil Collection and Lloyd's of London I am an engineer Often people will call me an architect engineer as a compliment It is meant to signify a quality of engineer who is more imaginative and design orientated than a normal engineer To call an engineer an architect engineer because he comes up with unusual or original solutions is essentially to misunderstand the role of the engineer in society An Engineer Imagines is a rare look into the professional creativity and philosophy of Peter Rice who was widely acclaimed as the greatest structural engineer of his generation He was a man who in Renzo Piano's words could design structures like a pianist who can play with his eyes shut Working with many of the world's greatest architects on buildings that became icons of contemporary architecture he brought a uniquely poetic feeling to his work Joining Ove Arup Partners in 1956 Rice had heard that it was a place where an oddball could fit in Taking on Arup's theory of Total Design to heart Rice writes about the role of the engineer in society and how he himself applied his creativity to various projects He admits he became an engineer by accident tentatively feeling his way through a career without a natural instinct But as he takes you through each of his projects one by one you can trace his development from graduate to veteran Written in clear and poetic language Rice's autobiography is perfect for those who want to better understand postwar buildings our concrete environment or are budding students of engineering and architecture *Engineer Imagines*, 2016 *An Engineer Imagines* Peter Rice, 1993
