

For more information on the curb weights, cargo weights, cargo weight rating, and recommended center of gravity zone of your vehicle, see your GM dealer. Ask for a copy of "Consumer Information, Truck Camper Loading" for the appropriate model and year. Also, be sure to read "Truck-Camper Loading Information" in this manual.

#### TRAILERING PACKAGE

Your vehicle, if equipped with Trailering Package, also carries a load rating for the combination of the vehicle and the trailer it tows. This is abbreviated GCWR (Gross Combination Weight Rating). Gross Combination Weight (GCW) is defined as "The total of the weight of the loaded tow vehicle and the loaded trailer." Remember, the weight of passengers is part of the load in the tow vehicle. Be sure you have included the weight of everything you put into the trailer before you weigh it.

#### TIRES

The tires on your vehicle must be of proper size and properly inflated for the load which you are carrying.

The Vehicle Certification Label shows the originally equipped tire size and recommended inflation pressures.

## SECURE CARGO

**CAUTION:** To help avoid personal injury during a collision or sudden maneuver, always take extra care when stowing things. Put luggage or cargo in the rear area if possible. Cargo weight inside the vehicle should be located as far forward as possible. On vehicles that have luggage carriers, distribute cargo weight on the carrier as evenly as possible. Secure all items in place to help keep them from being thrown about. Do not pile luggage or cargo higher than the seatbacks.

## TRUCK-CAMPER LOADING INFORMATION

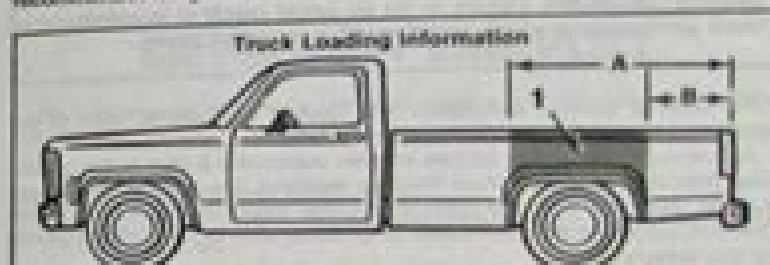

Your vehicle's appropriate truck-camper loading information is printed on a label located on the trailing edge of the driver's door. This information will help you avoid overloading and improper load distribution in truck-camper combinations. It will also help obtain a proper pickup truck and slide-in camper match.

When the truck can be used to carry a slide-in camper, the total cargo load of the truck consists of:

- the manufacturer's camper weight figure,
- the weight of installed additional camper equipment not included in the manufacturer's camper weight figure,

- the weight of camper cargo, and
- the weight of passengers in the camper.

The total cargo load should not exceed the truck's cargo weight rating, and the camper's center of gravity should fall within the truck's recommended cargo center of gravity zone when installed.

1. Recommended location for cargo center of gravity for cargo weight rating (Pickup Truck).

Note: Use rear edge of load floor for measurement purposes.

#### Example of Proper Truck and Camper Match

1. Camper center of gravity.  
2. Recommended center of gravity location zone.

B-08469

Cargo Weight Rating (CWR) means the amount specified by the vehicle manufacturer as the vehicle's cargo carrying capacity in pounds. The CWR does not include the weight of occupants, which would generally be computed as 150 pounds times the number of designated seating positions.

Your truck dealer will assist you in obtaining a proper truck-camper match. Your dealer will also help ensure that the vehicle load capacities are not exceeded.
