Analytical Applications of Functionalized

Magnetic Nanoparticles Chaudhery Mustansar Hussain, 2021-07-27 Magnetic nanoparticles MNPs uniquely combine

superparamagnetic performance with dimensions that are smaller than or similar size to molecular analytes Recently functionalized MNPs are predicted to be a driver for technology and business in this century and hold the promise of high performance materials that will significantly influence all aspects of society Functionalized MNPs are creating new possibilities for development and innovation in different analytical procedures Despite their participation in modern development they are in their infancy and largely unexplored for their practical applications in analysis This book will provide quality research and practical guidance to analytical scientists researchers engineers quality control experts and laboratory specialists It covers applications of functionalized MNPs in all stages of analytical procedures Their incorporation has opened new possibilities for sensing extraction and detection enabling an increase in sensitivity magnifying precision and

improvement in the detection limit of modern analysis Toxicity safety risk and legal aspects of functionalized MNPs and the future of analytical chemistry with respect to their use is covered The book provides an integrated approach for advanced analytical methods and techniques for postgraduates and researchers looking for a reference outlining new and advanced techniques surrounding the applications of functionalized nanomaterials in analytical chemistry
