Accountability

Accountability refers to the obligation of an individual or organization to account for its activities, accept responsibility for them, and disclose the results in a transparent manner. It involves being answerable to someone for something you have done or, sometimes more importantly, have failed to do.

The Dimensions of Accountability

1. **Personal Accountability:** This involves taking responsibility for one's actions, decisions, and their consequences. It's about owning up to mistakes and learning from them.
2. **Professional Accountability:** In the workplace, it entails fulfilling one's duties to the best of one's ability and being answerable for the outcomes.
3. **Social Accountability:** This extends to how actions and decisions impact society and the environment, emphasizing the need for ethical and sustainable practices.

The Importance of Accountability

1. **Trust Building:** Accountability fosters trust in relationships, whether personal, professional, or societal. When individuals and institutions are accountable, they earn the trust of those they interact with or serve.

Accountability and Democracy Craig T. Borowiak, 2011-07-01 Few political concepts are as emblematic of our era as democratic accountability. In a time of political and economic turmoil in which global forces have destabilized conventional relations of political authority, democratic accountability has come to symbolize both what is absent and what is desired in our polity. Situated at the intersection of democratic theory and international studies, *Accountability and Democracy* provides an in-depth critical analysis of accountability. Through an engagement with several key democratic traditions, both ancient and modern, the book paints a rich picture of democratic accountability as a multi-dimensional concept harboring competing imperatives and diverse instantiations. Contrary to dominant views that emphasize discipline and control, Craig Borowiak offers an original and refreshing view of democratic accountability as a source of mutuality, participation, and political transformation. He both creatively engages conventional electoral models of accountability and moves beyond them by situating democratic accountability within more deliberative, participatory, and agonistic contexts. Provocatively, the book also challenges deep-seated understandings of democratic accountability as an expression of popular sovereignty. Borowiak instead argues that accountable governance is incompatible with all claims to ultimate authority, regardless of whether they refer to the demos, the state, or cosmopolitan public law. Rather than conceiving of democratic accountability as a way to legitimize a secure and sovereign political order, the book contends that destabilization and democratic insurgence are indispensable and often neglected facets of democratic accountability practices. For contemporary scholars, practitioners, and activists grappling with the challenge of building democratic legitimacy into world politics, the book urges greater reflexivity and nuance in how democratic accountability is evoked and implemented. It offers insights into the myriad ways democratic accountability has been thwarted in the past while also cultivating a sense of expanded possibility for how it might be conceived for the present.

Assessment for Social Justice Jan McArthur, 2019-09-19 Assessment for Learning (AfL) has become an established idea within higher education based on the evidence that assessment is one of the most powerful drivers of student learning and thus can be harnessed as a means to improve learning. *Assessment for Social Justice* looks at assessment in higher education through the lens of critical pedagogy and social justice and offers new insights to both fields of enquiry. The starting premise adopted from AfL is that the way in which we form and practice assessment can and should influence the social justice outcomes of higher education. Looking at a number of different theories of social justice, Jan McArthur explores how

alternative theories provide the foundations for different types of assessment practice The theories explored include the works of John Rawls Theodor Adorno Amartya Sen Martha Nussbaum Nancy Fraser and Axel Honneth McArthur then explores different examples of assessment and how these embody or constrain alternative theories of social justice She provides a theoretically rigorous understanding of assessment as a social practice and as a vehicle both for and against social justice Assessment for social justice is explored in two complementary ways the justice of assessment within higher education and assessments that promote greater social justice and in doing so this book contributes to ongoing debates about the nature and purposes of higher education *Survey of Science Fiction Literature* Frank Northen Magill,1979
