yourself to avoid falling into the trap set by certain statistics. Statistics are very useful but they can be misused to sell a product, convince voters or attract attention. For example, a local newspaper with its focus on crime may make its readers believe that they live in a dangerous place and a study explaining that after ingesting a certain medication, colds tend to disappear, may make people buy a product that is as effective as no treatment at all. Statistics have the devious advantage of appearing factual, which is what makes them attractive but in the mouth of a dishonest person, they can fool even the most discerning readers. This book serves not as an instruction manual for crooks but as a self-defense manual for their potential victims, honest people.
