Part Description	

Note: If any of the components that affect the spring for the PTO are being changed, or the Power Take-Off (PTO) is being installed for the first time, the PTO must be calibrated.

NOTICE

The spring of the PTO control valve will be installed in the PTO. The assembly is spring loaded and may damage components before the PTO is installed. If the spring pressure pushes it out of the housing without being retained, the internal parts of the valve will fly apart and may be lost or damaged. In the event the valve does become disassembled, refer to the following figure to see the details required to assemble the valve.

1. Stop the engine, apply the parking brake, chock the wheels, and perform any other applicable safety steps.
2. If the PTO spring does not fly out of the housing, install a bolt in the end, use a handle, and remove the seal.
