Handbook of Parenting

and Child Development Across the Lifespan Matthew R. Sanders, Alina Morawska, 2018-12-06 This handbook presents the

latest theories and findings on parenting from the evolving roles and tasks of childrearing to insights from neuroscience

prevention science and genetics Chapters explore the various processes through which parents influence the lives of their

children as well as the effects of parenting on specific areas of child development such as language communication cognition

emotion sibling and peer relationships schooling and health Chapters also explore the determinants of parenting including

consideration of biological factors parental self regulation and mental health cultural and religious factors and stressful and

complex social conditions such as poverty work related separation and divorce In addition the handbook provides evidence

supporting the implementation of parenting programs such as prevention early intervention and treatments for established

issues The handbook addresses the complementary role of universal and targeted parenting programs the economic benefits

of investment in parenting programs and concludes with future directions for research and practice Topics featured in the

Handbook include The role of fathers in supporting children's development Developmental disabilities and their effect on

parenting and child development Child characteristics and their reciprocal effects on parenting Long distance parenting and

its impact on families The shifting dynamic of parenting and adult child relationships The effects of trauma such as natural

disasters war exposure and forced displacement on parenting The Handbook of Parenting and Child Development Across the

Lifespan is an essential reference for researchers graduate students clinicians and therapists and professionals in clinical

child and school psychology social work pediatrics developmental psychology family studies child and adolescent psychiatry

and special education
