**of Strategy** James O. Fiet, 2025-02-10 This scholarly work critically examines theoretical deficiencies in the field of strategy delineating their origins and impact on research and practice. Though it could be viewed as a broadside against the field for the way that it has developed during its first 70 years it is intended to be an effort to nudge it forward which will require major institutional reforms not just in how it evaluates its research but also in how it combines theories pedagogically. The author contends that the prevalent publish or perish paradigm successful in the hard sciences has failed in building a cumulative understanding in the social sciences including economics which relies on linkages with others to build cumulative knowledge. This book scrutinizes the consequences of using theory with inappropriate units of analysis emphasizing the importance of justified expectations. Geared towards researchers it contributes to the discourse on theoretical development in the field of strategy.

The corporate image he created for the Olympic Games in Munich which made an essential contribution to the ambience of the event has also remained memorable. Since the ideas developed by Aicher and his colleagues were implemented in the early sixties the airline has been seen world wide as a perfect example of a consistently developed corporate image. Aicher based himself on ideas from the Deutscher Werkbund and took the company's entire inventory into consideration house colours pictorial and typographic logos typeface graphic and typographic rules and standards photographic style quality of support materials packaging exhibition systems architectural characteristics forms design of interior furnishings and equipment style of work and service clothes.
