2013 Mathematics Vision Project Answers:

The Five Practices in Practice [High School] Margaret (Peg) Smith, Michael D. Steele, Miriam Gamoran Sherin, 2020-02-26 This book makes the five practices accessible for high school mathematics teachers. Teachers will see themselves and their classrooms throughout the book. High school mathematics departments and teams can use this book as a framework for engaging professional collaboration. I am particularly excited that this book situates the five practices as ambitious and equitable practices. Robert Q Berry III NCTM President 2018-2020 Samuel Braley Gray Professor of Mathematics Education University of Virginia Take a deeper dive into understanding the five practices anticipating monitoring, selecting, sequencing, and connecting for facilitating productive mathematical conversations in your high school classrooms and learn to apply them with confidence. This follows up to the modern classic 5 Practices for Orchestrating Productive Mathematics Discussions, which shows the five practices in action in high school classrooms and empowers teachers to be prepared for and overcome the challenges common to orchestrating math discussions. The chapters unpack the five practices and guide teachers to a deeper understanding of how to use each practice effectively in an inquiry-oriented classroom. This book will help you launch meaningful mathematical discussion through Key questions to set learning goals, identify high level tasks, anticipate student responses, and develop targeted assessing and advancing questions that jumpstart productive discussion before class begins. Video excerpts from real high school classrooms that vividly illustrate the five practices in action and include built in opportunities for you to consider effective ways to monitor students' ideas and successful approaches for selecting, sequencing, and connecting students' ideas during instruction. Pause and Consider prompts that help you reflect on an issue and in some cases draw on your own classroom experience prior to reading more about it. Linking To Your Own Instruction sections help you implement the five practices with confidence in your own instruction. The book and companion website provide an array of resources including planning templates, sample lesson plans, completed monitoring tools, and mathematical tasks. Enhance your fluency in the five practices to bring powerful discussions of mathematical concepts to life in your classroom.

Intelligent Computer Mathematics Stephen M. Watt, Alan Sexton, James H. Davenport, Petr Sojka, Josef Urban, 2014-06-30 This book constitutes the joint refereed proceedings of Calculemus 2014, Digital Mathematics Libraries DML 2014, Mathematical Knowledge Management MKM 2014, and Systems and Projects S+P 2014, held in Coimbra, Portugal, during July 7–11, 2014, as four tracks of CICM 2014, the Conferences on Intelligent Computer Mathematics. The 26 full papers and 9 Systems and Projects descriptions presented together with 5 invited talks were carefully reviewed and selected from a total of 55 submissions. The Calculemus track of CICM examines the integration of symbolic computation and mechanized reasoning. The Digital Mathematics Libraries track evolved from the DML workshop series; features math-aware technologies, standards, algorithms, and processes towards the fulfillment of the dream of a global DML. The Mathematical Knowledge Management track of CICM is concerned with all aspects of managing
