From Maps to Metaphors Robin Fisher, Hugh Johnston, 2011-11-01 During the summers of 1792 94 George Vancouver and the crew of the British naval ships Discovery and Chatham mapped the northwest coast of North America from Baja California to Alaska Vancouver s voyage was the last and longest of the great Pacific voyages of the late eighteenth century Taking the art and technique of distant voyaging to a new level Vancouver eliminated the possibility of a northwest passage and his remarkably precise surveys completed the outline of the Pacific But to map an area is to appropriate it to begin to bring it under control and Vancouver s charts of the northwest coast were part of a process of economic exploitation and cultural disruption Although he and the other great navigators of his age exercised no control over the ideas and enterprises spawned by their voyages their names have come to symbolize the consequences of European expansion good or bad From Maps to Metaphors grew out of the Vancouver Conference on Exploration and Discovery held to observe the bicentennial of Vancouver s arrival on the Pacific northwest coast It brings to light much of the new research on the discovery of the Pacific and illuminates the European and Native experience The chapters are written from a variety of perspectives and provide new insights on many aspects of Vancouver s voyages from the technology employed to the complex political and power relationships among European explorers and the Native leadership While it is no longer possible to

celebrate the arrival to the northwest coast of explorers such as Vancouver their achievements cannot be overlooked The charts log books journals and specimens from these voyages are important sources of information and essential for the reconstruction of an image of the Pacific region and its people in the eighteenth century **Miscellaneous Documents**
