**House Documents, Otherwise Publ. as Executive Documents** United States. Congress. House, 1874      **Tools and Algorithms for the Construction and Analysis of Systems** Dana Fisman, Grigore Rosu, 2022-03-29 This open access book constitutes the proceedings of the 28th International Conference on Tools and Algorithms for the Construction and Analysis of Systems TACAS 2022 which was held during April 2-7 2022 in Munich Germany as part of the European Joint Conferences on Theory and Practice of Software ETAPS 2022. The 46 full papers and 4 short papers presented in this volume were carefully reviewed and selected from 159 submissions. The proceedings also contain 16 tool papers of the affiliated competition SV Comp and 1 paper consisting of the competition report. TACAS is a forum for researchers, developers, and users interested in rigorously based tools and algorithms for the construction and analysis of systems. The conference aims to bridge the gaps between different communities with this common interest and to support them in their quest to improve the utility, reliability, executability, and efficiency of tools and algorithms for building computer controlled systems.      Methodologies for Effective Writing Instruction in EFL and ESL Classrooms Al-Mahrooqi, Rahma, 2014-10-31 Educators continue to strive for advanced teaching methods to bridge the gap between native and non-native English speaking students. Lessons on written forms of communication continue to be a challenge recognized by educators who wish to improve student comprehension and overall ability to write clearly and expressively. Methodologies for Effective Writing Instruction in EFL and ESL Classrooms brings together research and practices for successful written communication teaching among students of diverse linguistic backgrounds. With technological advancements and resources, educators are able to implement new tools into their lesson plans for the benefit of their students. This publication is an essential reference source for professionals, educators, and researchers interested in techniques and practices for written communication in English language teaching geared towards non-native English speaking students.      **Geology of North Africa and the Mediterranean: Sedimentary Basins and Georesources** Sami Khomsi, Francois Roure, 2023-03-18 This book summarizes the links between the evolution of sedimentary basins of Northern Africa and the Peri-Mediterranean in different tectonic settings and the distribution of georesources in those basins. Georesources include fossil energy, geothermal energy, deep aquifers, minerals, and deposits. This book also provides key information for energy resources in these important areas. The book is in part a compilation of selected papers from the Atlas Georesources International Congress Hammamet, Tunisia, AGIC 2017, which were extended after the congress in addition to other contributions from geoscientists based at some universities and companies from the region. It is organized in a set of research studies focusing on the architecture, geodynamic evolution, and modeling of sedimentary basins in the Middle East, North Africa, and the Mediterranean domain. Future developments in the exploration for water energy and other georesources are very important in these regions. In this context, this book constitutes an important reference for a wide range of geoscientists and companies as it defines the distribution and potentialities of these resources.

**Owning the Earth** Andro Linklater, 2014-01-01 Barely two centuries ago most of the world's productive land still belonged either communally to traditional societies or to the higher powers of monarch or church. But that pattern and the ways of life that went with it were consigned to history as a result of the most creative and at the same time destructive cultural force in the modern era: the idea of individual exclusive ownership of land. This notion laid waste to traditional communal civilisations, displacing entire peoples from their homelands and brought into being a unique concept of individual freedom and a distinct form of representative government and democratic institutions. Other great civilizations in Russia, China and the Islamic world evolved very different structures of land ownership and thus very different forms of government and social responsibility. The seventeenth century English surveyor William Petty was the first man to recognise the connection between private property and free market capitalism; the American radical Wolf Ladejinsky redistributed land in Japan, Taiwan and South Korea after the Second World War to make possible the emergence of Asian tiger economies. Through the eyes of these remarkable individuals and many more including Chinese emperors and German peasants, Andro Linklater here presents the evolution of land ownership to offer a radically new view of mankind's place on the planet.
