Proceedings of the Fourth International Congress on Mathematical Education M. Zweng, Green, Kilpatrick, Pollack, Suydam, 2012-12-06 Henry O. Pollak Chairman of the International Program Committee Bell Laboratories Murray Hill New Jersey USA The Fourth International Congress on Mathematics Education was held in Berkeley California USA August 10-16 1980. Previous Congresses were held in Lyons in 1969, Exeter in 1972, and Karlsruhe in 1976. Attendance at Berkeley was about 1800 full and 500 associate members from about 90 countries. At least half of these come from outside of North America. About 450 persons participated in the program either as speakers or as presiders. Approximately 40 percent of these came from the U.S. or Canada. There were four plenary addresses: they were delivered by Hans Freudenthal on major problems of mathematics education, Hermina Sinclair on the relationship between the learning of language and of mathematics, Seymour Papert on the computer as carrier of mathematical culture, and Hua Loo Keng on popularising and applying mathematical methods. George Polya was the honorary president of the Congress. Illness prevented his planned attendance but he sent a brief presentation entitled "Mathematics Improves the Mind". There was a full program of speakers, panelists, debates, miniconferences, and meetings of working and study groups. In addition, 18 major projects from around the world were invited to make presentations and various groups representing special areas of concern had the opportunity to meet and to plan their future activities.

Implementing NCLB

Paul Kimmelman, 2006-03-23. Implementing NCLB is an important guide to thinking about how to create the infrastructure to support sustained school improvement. Kimmelman's extensive experience as an educator coupled with his understanding of policymaking and research allow him to transcend the silos that too often constrain thinking about these issues. Andrew J. Rotherham Co-Director Education Sector Senior Fellow Progressive Policy Institute Member Virginia Board of Education. This inspirational book provides a convincing and compelling call to action. Kimmelman provides plenty of practical examples and moves easily between specific applications and the big picture. Michael Fullan Professor OISE University of Toronto. I believe this book should be read by every administrator and teacher leader. It provides a framework for schools to address the need for continuous school improvement in order to meet the expectations of NCLB. Theron J. Schutte Superintendent Boone Community School District IA. How can NCLB directives be successfully applied to school improvement efforts? Meeting the requirements of NCLB is a monumental task. In a concise, straightforward manner, author Paul L. Kimmelman shows readers how to overcome this challenge by building organizational capacity through a knowledge model. This model provides a simple

but effective framework for evidence based continuous improvement that complies with the fundamental underpinnings of NCLB Key features include A context setting overview of the politics and education initiatives that led to NCLB An analysis of what educational leadership means in an age of accountability Lessons in leadership from educators scientists explorers and entrepreneurs Practical examples reflective questions and action ideas to help link concepts to specific applications Recommended resources publications and products to help build organizational capacity Intended for educators and administrators who have an active role in leading their school or district improvement activities this book will also be an essential resource for focusing the efforts of school improvement and learning teams
