Ninth Grade Reading Comprehension 10: Unlucky Pizza Guy

There once was a pizza delivery guy named Mike. He was a hardworking young man who always made sure to deliver his pizzas on time. One day, he received an order for a large pepperoni pizza with extra cheese. It was a busy night, but Mike was determined to deliver the pizza on time.

As he was driving to the customer's house, he suddenly hit a pothole in the road. The pizza flew out of the box and landed upside down on the car seat. Mike was devastated but knew he had to deliver the pizza.

When he arrived at the customer's house, he nervously knocked on the door. A man answered, and Mike explained what had happened to the pizza. The man looked inside the box and burst out laughing.

"What's so funny?" Mike asked.

The man replied, "Well, I ordered a pizza with extra cheese, but I didn't know it would come with extra seat cushion."

Mike was mortified, but the customer assured him that it was a funny mistake, and he would still pay for the pizza.

As Mike drove back to the pizza shop, he couldn't help but laugh at the absurdity of the situation. He knew he would never forget the day he delivered a pizza with extra seat cushion.

Questions:

1. What was the pizza delivery guy's name?

2. What was the order for the pizza?

3. What happened to the pizza on the way to the customer's house?

4. How did the customer react when he saw the pizza?

5. Did the customer pay for the pizza?

Summary question: What was the mistake that the pizza delivery guy made while delivering the pizza?

Academic Literacy and the Nature of Expertise Cheryl Geisler,2013-11-05 The first full length account integrating both the cognitive and sociological aspects of reading and writing in the academy this unique volume covers educational research on reading and writing rhetorical research on writing in the disciplines cognitive research on expertise in ill defined problems and sociological and historical research on the professions The author produced this volume as a result of a research program aimed at understanding the relationship between two concepts literacy and expertise which traditionally have been treated as quite separate phenomena A burgeoning literature on reading and writing in the academy has begun to indicate fairly consistent patterns in how students acquire literacy practices This literature shows furthermore that what students do is quite distinct from what experts do While many have used these results as a starting point for teaching students how to be expert the author has chosen instead to ask about the interrelationship between expert and novice practice seeing them both as two sides of the same project a cultural historical professionalization project aimed at establishing and preserving the professional privilege The consequences of this professionalization project are examined using the discipline of academic philosophy as the site for the author s investigations Methodologically unique these investigations combine rhetorical analysis protocol analysis and the analysis of classroom discourse The result is a complex portrait of how the participants in this humanistic discipline use their academic literacy practices to construct and reconstruct a great divide between expert and lay knowledge This monograph thus extends our current understanding of the rhetoric of the professions and examines its implications for education *Resources in Education* ,1987 **Bulletin** United States.
