Exercise 1.1

Part I

1. P: Titanium combines readily with oxygen, nitrogen, and hydrogen, all of which have an adverse effect on its mechanical properties.
C: Titanium must be processed in their absence.
2. P: The good, according to Plato, is that which furthers a person's real interests.
C: In any given case when the good is known, men will seek it.
3. P: The denial or perversion of justice by the sentences of courts, as well as in any other manner, is with reason classed among the just causes of war.
C: The federal judiciary ought to have cognizance of all causes in which the citizens of other countries are concerned.
4. P: When individuals voluntarily abandon property, they forfeit any expectation of privacy in it that they might have had.
C: A warrantless search and seizure of abandoned property is not unreasonable under the Fourth Amendment.
5. P₁: Artists and poets look at the world and seek relationships and order.
P₂: But they translate their ideas to canvas, or to marble, or into poetic images.
P₃: Scientists try to find relationships between different objects and events.
P₄: To express the order they find, they create hypotheses and theories.
C: The great scientific theories are easily compared to great art and great literature.
6. P₁: The animal species in Australia are very different from those on the mainland.
P₂: Asian placental mammals and Australian marsupial mammals have not been in contact in the last several million years.
C: There was never a land bridge between Australia and the mainland.
7. P₁: We need sleep to think clearly, react quickly, and create memories.
P₂: Studies show that people who are taught mentally challenging tasks do better after a good night's sleep.
P₃: Other research suggests that sleep is needed for creative problem solving.
C: It really does matter if you get enough sleep.
8. P₁: The classroom teacher is crucial to the development and academic success of the average student.
P₂: Administrators simply are ancillary to this effort.
C: Classroom teachers ought to be paid at least the equivalent of administrators at all levels, including the superintendent.

History and Philosophy of Science. A Concise Introduction Amodu Akeem, 2017-12-08 Scientific Essay from the year 2016 in the subject Philosophy Miscellaneous grade A language English abstract The importance of science cannot be over emphasized As a matter of fact it

is almost if not absolutely impossible to imagine our world without science. Living in the twenty first century is almost synonymous with living the scientific life. Science has touched every aspect of human existence so much that man today cannot do without science. Living is today characterized by the use of the discoveries of science which to a large extent makes for safer, faster and easier ways of doing things. A good instance of a scientific discovery that has positively impacted all aspects of human existence is electricity. Electricity has changed the way we live, play, work, eat and communicate among others. The invention of electricity gave birth to the idea of electric bulbs, electric kettles, electric heaters, refrigerators, air conditioners, elevators, automated teller machines, ATM computers and telecommunication among others. But for the discovery of the scientific phenomenon called electricity, humans would have remained crude, unsafe and at the mercy of the vagaries of nature. Similarly, science has transformed the way we move and transport goods and services. Motorcycles, cars, trains, ships, jets and airplanes have all made movements of people, goods and services safer, easier and faster. A journey of days from one part of the world to another is today only a matter of hours with airplanes. Livestock are moved in transport facilities that not only ensure their safety but also ensure fast delivery in any part of the world. This brings us to the impact of science on agriculture. Hardly does a day go by without the need for food by both humans and animals. Food production is key to survival. Science has impacted on food crop production processes from planting, harvesting, storing and distributing. With the inventions of science such as bulldozers, planting machines, harvesters, insecticides and herbicides among others, farmers today farm with ease and less stress as against the hardship faced by farmers in earlier centuries.

Genetics Daniel Hartl, Maryellen Ruvolo, 2012. This textbook gives an introduction to genetics and genomics at the college level. It contains a chapter on human genetic evolution. Other chapters treat transmission genetics, molecular genetics and evolutionary genetics and provide an understanding of the basic process of gene transmission, mutation, expression and regulation.
