*Foreign Direct Investment in Agriculture* Jan Schüpbach, 2015-10-07 Foreign direct investment in agriculture and land has increased substantially since the 2007-2008 food price crisis. However, there is a severe lack of quantitative evidence on its economic impact. Therefore, the primary goal of this study was to collect and analyze empirical evidence in order to better understand the potential benefits and pitfalls of such investments and related processes of agricultural commercialization. In particular, the study tests the effect of two strategies for including smallholder farmers into modern food supply chains: 1. Outgrower schemes, i.e. a type of contract farming whereby small-scale farmers produce crops for large-scale farming enterprises; 2. Wage employment on large-scale estates. The central part of the study looks at one specific investment project in the Zambian sugar cane sector. This sectoral focus was supplemented by a broader cross-sectoral analysis of a large nationally representative panel survey. Overall, the evidence suggests that large-scale investments by foreign as well as domestic companies and especially the model of cooperation with smallholder farmers in outgrower schemes can indeed have positive and significant effects on the income and wealth of rural households.

**Research Methodology in Agricultural Sciences** Jayne Njeri Mugwe, Steven Runo, 2026-01-01 This authored textbook provides a comprehensive guide to the methods and methodologies currently used in agricultural research, covering the entire process from conceptualisation to reporting. Recognising the interdisciplinary nature of agricultural science, the book integrates both biophysical and social science approaches, including experimental design on farm, research surveys, qualitative and mixed methods research, and impact evaluation. It also addresses both quantitative and qualitative data analysis. In addition to methodological guidance, the book offers practical support in scientific writing, thesis development, journal article publication, and science communication. Theories and concepts are clearly explained using real-world examples, flow diagrams, photographs, and case studies to enhance understanding. Designed to support students and early career researchers, this book helps ease the steep learning curve associated with conducting credible ethical and impactful research. It will be a valuable resource for students, faculty, researchers, professionals, agricultural scientists, and policy makers in both national and international contexts.

**Critical Issues in Contemporary China** Czeslaw Tubilewicz, 2016-12-12 *Critical Issues in Contemporary China: Unity, Stability, and Development* comprehensively examines key problems crucial to understanding modern-day China. Organized around three interrelated themes of unity, stability, and development, each chapter explores distinct issues and debates their significance for China domestically and for Beijing's engagement with the wider world. While presenting contending explanatory approaches, contributors advance arguments to further critical discussion on selected topics. Main issues analysed include political change, military transformation, legal reforms, economic development, energy security, environmental degradation, food security and safety, demographic trends, migration and urbanization, labour unrest, health and education, social inequalities, ethnic conflicts, Hong Kong's integration, cross-strait relations. Given its thorough and up-to-date assessment of major political

social and economic challenges facing China this fully revised and substantially expanded new edition is an essential read for any student of Chinese Studies
