**Lessons for REDD+ benefit-sharing mechanisms from anti-corruption measures in Indonesia** Shintia Dian Arwida, Sofi Mardiah, Cecilia Luttrell, 2015-05-19      **Decentring Development** T. Jakimow, 2016-04-29 The ways we understand processes of agrarian change are pressing issues for policy makers and development practitioners Interpreting changes in two agrarian societies in India and Indonesia the author reveals how transformations to self are critical factors shaping change as well as under recognized consequences of development initiatives      *The Uganda Gazette* Uganda, 2016-05      Bihar and Mithila J. Albert Rorabacher, 2016-09-13 The world has become obsessed with the Western notions of progress development and globalization the latter a form of human and economic homogenization These processes through the aegis of the United Nations are comparatively monitored Those nations deemed to be lagging behind are then provided with foreign aid and developmental assistance For nearly seventy years India has sought its place in this global endeavour yet even today abject poverty and backwardness can be observed in districts in almost every state with the highest concentration of such districts found in the state of Bihar and a cultural enclave known as Mithila Development in India has been elusive because it is difficult to define and because the Western concepts of development and progress have no absolute equivalents within many non Western settings As a consequence development programmes often fail because they are unable to ask the right questions but equally important is the political economy derived from foreign aid For politicians there is no long term benefit to be derived from successful development In general foreign aid only serves to corrupt governments and politicians and in the end does very little for those who need help The struggling states of Bihar and Mithila serve as extreme examples of India's problems Development here has been thwarted by a hereditary landed aristocracy supported by religion casteism custom social stratification tradition and patterns of behaviour that can be traced back millennia In turn all these have been masterfully manipulated by co-opted politicians who have turned politics into a veritable art form as this volume comprehensively demonstrates      *The World's Search for Sustainable Development* Mukul Sanwal, 2015-11-05 This text traces the evolution of sustainable development and climate change from the time it emerged in international consultations and agreements The three sections of the book focusing on the framework climate change and sustainable development seek to cover the essentials of the politics of natural resource usage at the global level The book explores the evolution of sustainable development and climate change within the framework of the United Nations and the way the concept has been defined through intergovernmental meetings agreements and consensus within the multilateral system It also explores the best ways of reducing the risk to the planet while enabling societies to pursue sustainable development paths The challenges call for a transformation of social systems to facilitate a broadly acceptable change The book also explores the adoption of low carbon models different from the high carbon socio technical systems and related social practices      The Unmaking of Arab Socialism Ali Kadri, 2016-10-01 Conditions of malnutrition conflict or a

combination of both characterize many Arab countries but this was not always so As in much of the developing world the immediate post independence period represented an age of hope and relative prosperity But imperialism did not sleep while these countries developed and it soon intervened to destroy these post independence achievements The two principal defeats and losses of territory to Israel in 1967 and 1973 as well as the others that followed left in their wake more than the destruction of assets and the loss of human lives the Arab World lost its ideology of resistance The Unmaking of Arab Socialism is an attempt to understand the reasons for Arab world s developmental descent from the pinnacle of Arab socialism to its present desolate conditions through an examination of the post colonial histories of Egypt Syria and Iraq

**Economics of Agricultural Development** George W. Norton, Jeffrey Alwang, William A. Masters, 2021-08-01 Economics of Agricultural Development examines the causes severity and effects of poverty population growth and malnutrition in developing countries It discusses potential solutions to these problems progress made in many countries in recent years and the implications of globalization for agriculture poverty and the environment Topics covered in the book include Means for utilizing agricultural surpluses to further overall economic development The sustainability of the natural resource environment Gender issues in relation to agriculture and resource use The contribution of improved technologies to agricultural development The importance of agricultural policies and institutions to development and trade Actions to encourage more rapid agricultural and economic development This new edition reflects the following developments Growth in environmental challenges due to climate change Continued progress in agricultural and economic development in many low income countries while other countries and regions are being left behind Continued growth in demand for higher valued farm products This book is essential reading for undergraduate students seeking to understand the economics of agricultural development and the world food system including environmental and human consequences international trade and capital flows It contains a wealth of real world case studies and is accompanied by a website

**Dietary Nutrients, Additives and Fish Health** Cheng-Sheng Lee, 2015-05-05 Fish nutrition can be the deciding factor between a robust and healthy farmed fish population and low aquaculture production In an age where chemicals and antibiotics are under greater scrutiny than ever a strong understanding of the role of nutrients and feed additives is essential in the aquaculture industry Dietary Nutrients Additives and Fish Health is a comprehensive review of dietary nutrients antinutritional factors and toxins and non nutrient dietary additives and their effects on fish performance and immune system function as well as overall health The book opens with an overview of fish immune systems and health Subsequent chapters delve into proteins and amino acids lipids and fatty acids carbohydrates beta glucans vitamins minerals antinutrients mycotoxins nucleotides prebiotics probiotics organic acids and their salts and plant extracts and their impacts on fish health growth and development The text then concludes with a chapter on feeding practices Authored by leaders in aquaculture Dietary Nutrients Additives and Fish Health will be an invaluable resource to graduate students researchers and professionals alike
