How Free Trade Agreements and Customs Unions Differ?

Both free trade agreements and customs unions are trade agreements between trading nations. In a free trade agreement, member nations trade freely among themselves. Each nation, however, sets its own trade policy with non-member nations. In a customs union, member nations trade freely with each other and with non-member nations. They also have agreed to remove all trade barriers among themselves. They also have agreed to have a single trade policy with non-member nations.

What is NAFTA?

The North American Free Trade Agreement (NAFTA) is a trade agreement signed by Mexico, Canada, and the United States. It was signed in 1994 and entered into force in 1994. It is a free trade agreement between three nations and is the largest free trade agreement in the world. It covers the entire North American continent. The agreement has created a single market for goods and services among the three nations. It has also created a single market for investment. The agreement has created a single market for intellectual property. The agreement has created a single market for labor. The agreement has created a single market for capital. The agreement has created a single market for technology. The agreement has created a single market for information. The agreement has created a single market for culture. The agreement has created a single market for environment. The agreement has created a single market for social issues. The agreement has created a single market for all issues.

President Clinton, Prime Minister Jean Chrétien, and President Fox signed the North American Free Trade Agreement in 1994.
