*The Carbon Buster's Home Energy Handbook* Godo Stoyke, 2006-11-01 Most people are unaware that environmental problems such as climate change can be easily avoided at a profit through the intelligent application of appropriate technology. The Carbon Buster's Home Energy Handbook describes how to achieve this goal in the residential field. The first book in North America to provide a detailed carbon accounting of a family's carbon emissions and how to reduce them, it systematically analyzes energy costs and evaluates which measures yield the highest returns for the environment and the pocketbook. It provides answers to questions such as: Which measure is more effective: putting solar panels on your roof or buying a hybrid car? Where do I need to invest first in high efficiency shower heads or solar tubes? Is a 500 litre fridge that uses 800 kWh of power per year a good buy? The book allows individuals to quickly and accurately assess which products are a good deal and which aren't. It systematically analyzes residential carbon emissions and energy costs and prioritizes solutions based on highest carbon reductions and monetary returns, yielding results that are often surprising. The book enables readers to dramatically reduce their carbon emissions far below the levels targeted under the Kyoto Protocol. At the same time, readers implementing the recommendations will save an average of 15% on energy costs over the next five years.

**Instructions** Amana Refrigeration, inc, 1976    **Domestic Goods** Joy Parr, 1999-12-15 Visions of life in the 1950s often spring from the United States supermarkets, freeways, huge gleaming cars, bright new appliances, automated households. Historian Joy Parr looks beyond the generalizations about the indulgence of this era to find a specifically Canadian consumer culture. Focusing on the records left by consumer groups and manufacturers and relying on interviews and letters from many Canadian women who had set up households in the decade after the war, she reveals exactly how and why Canadian homemakers distinguished themselves from the consumer frenzy of their southern neighbours. Domestic Goods focuses

primarily on the design production promotion and consumption of furniture and appliances For Parr such a focus demands an analysis of the intertwining of the political economic and aesthetic Parr examines how the shortage of appliances in the early postwar years was a direct result of government reconstruction policy and how the international style of high modernism reflected the postwar dream of free trade But while manufacturers devised new plans for the consumer depression era frugality and a conscious setting of priorities within the family led potential customers to evade and rework what was offered them eventually influencing the kinds of goods created This book addresses questions such as who designed furniture and appliances and how were these designs arrived at What was the role of consumer groups in influencing manufacturers and government policy Why did women prefer their old wringer washers for over a decade after the automatic washer was brought in In finding the answers the author celebrates and ultimately suggests reclaiming a particularly Canadian way of consuming
