[Geographical Knowledge Construction and Production](#) Archie K. Deen, 2015-09-02 Geographical Knowledge Construction and Production Teacher and Student Perspectives is a readable and illuminating account of three high school classrooms in suburban Atlanta, Georgia. It challenges the narrow focus of the Advanced Placement AP programme as a tool for admission into colleges and universities in the United States. The research

provides insight into the College Board's AP programme and argues for teaching and learning that is transformative and geared toward equipping students with the skills and knowledge necessary to confront the challenges of the 21st century. In particular, it advocates for geographic education that is anchored in the structure of the subject, teasing wherever possible the contradictions and tensions embedded in the complexities of facts relating to people and places. This book is essential reading for professors and students of education, teachers and students of AP courses, parents, administrators, and state and federal agencies vested in the AP programme.

### **The Need for a Cultural**

**Landscape Theory** Alexandru Calcatinge, 2012 The research in this book was born from an intellectual curiosity regarding the concept of cultural landscape. The study resulted from a desire to clarify and expand the understanding of the term as the starting point was the idea that a good practice is always based on a well built theory. Thus the purpose is to establish the importance of theoretical knowledge of the concept of cultural landscape. Series: Urban and Spatial Planning, Stadt und Raumplanung, Vol 12.
