

- (b) The figure below is a histogram of 200 diameters obtained by using one of the two sampling methods described. Considering the shape of the histogram, explain which method, Method 1 or Method 2, was most likely used to obtain a such a sample.

- (c) Which of the two sampling methods, Method 1 or Method 2, will result in less variability in the diameters of the 200 tortillas in the sample on a given day? Explain.

Each day, the distribution of the 200,000 tortillas made that day has mean diameter 6 inches with standard deviation 0.11 inch.

- (d) For samples of size 200 taken from one day's production, describe the sampling distribution of the sample mean diameter for samples that are obtained using Method 1.
- (e) Suppose that one of the two sampling methods will be selected and used every day for one year (365 days). The sample mean of the 200 diameters will be recorded each day. Which of the two methods will result in less variability in the distribution of the 365 sample means? Explain.
- (f) A government inspector will visit the facility on June 22 to observe the sampling and to determine if the factory is in compliance with the advertised mean diameter of 6 inches. The manager knows that, with both sampling methods, the sample mean is an unbiased estimator of the population mean. However, the manager is unsure which method is more likely to produce a sample mean that is close to 6 inches on the day of sampling. Based on your previous answers, which of the two sampling methods, Method 1 or Method 2, is more likely to produce a sample mean close to 6 inches? Explain.

explanations TABLE OF CONTENTS About Research non graphing calculators are allowed only if they have the  
computational capabilities described previously The following however are not permitted powerbooks and portable  
computers pocket organizers electronic writing pads pen input devices or devices with typewriter style or QWERTY  
keyboards ABOUT THE REVIEW SECTIONS As mentioned earlier this book has a review chapter for each of the four topics  
covered on the exam The following are the four review chapters in this book that cover the topics on the AP Statistics  
Exploring Data Planning a Study Anticipating Patterns Statistical Inferences The review chapters provide a thorough  
discussion of the material tested on the exam By studying the review chapters and by taking the practice test s you can  
prepare yourself to score high on the AP Statistics exam SCORING THE EXAM The multiple choice section of the exam is  
scored by crediting each correct answer with one point and deducting one fourth of a point for each incorrect answer  
Unanswered questions receive neither credit nor deduction The free response questions are graded by readers chosen from  
around the country for their familiarity with the AP Program Each free response question is read and scored with the reader  
providing the score on a 0 to 4 0 being the lowest and 4 the highest scale The free response questions are scored based on  
the statistical knowledge and communication the student used to answer the question The statistical knowledge criteria  
include identifying the important concepts of the problem and demonstrating statistical concepts and techniques that result  
in a correct solution of the problem The communication criteria include an explanation of what was done and why along with  
a statement of conclusions drawn Once the free response questions have been graded by all of the readers the scores are  
converted The open ended questions count as 75% of the free response score the investigative task question counts as 25%

**SCORING THE MULTIPLE CHOICE SECTION** For the multiple choice section use this formula to calculate your raw score  
 $\text{Number Right} - \text{Number Wrong} \times \frac{1}{4} = \text{Raw Score}$  round to the nearest whole number Note Do not include unanswered questions in the formula

**SCORING THE FREE RESPONSE QUESTIONS** For the free response section use this formula to calculate your raw score  
 $\frac{5 \text{ Open Ended Questions} \times 75\% + 1 \text{ Investigative Task Question} \times 25\%}{2} = \text{Raw Score}$

**THE COMPOSITE SCORE** To obtain your composite score use the following method  
 $\frac{\text{Multiple Choice Raw Score} + \text{Free Response Raw Score}}{2} = \text{Raw Score}$

AP grades are interpreted as follows  
5 extremely well qualified  
4 well qualified  
3 qualified  
2 possibly qualified  
1 no recommendation

**SCORES THAT RECEIVE COLLEGE CREDIT AND OR ADVANCED PLACEMENT** Most colleges grant students who earn at least a 3 college credit and or advanced placement You should check with your school guidance office about specific college requirements

**STUDYING FOR YOUR AP EXAMINATION** It is never too early to start studying The earlier you begin the more time you will have to sharpen your skills Do not procrastinate Cramming is not an effective way to study since it does not allow you the time needed to learn the test material It is very important for you to choose the time and place for studying that works best for you Some students may set aside a certain number of hours every morning to study while others may choose to study at night before going to sleep Other students may study during the day while waiting on a line or even while eating lunch Only you can determine when and where your study time will be most effective But be consistent and use your time wisely Work out a study routine and stick to it When you take the practice exam s try to make your testing conditions as much like the actual test as possible Turn your television and radio off and sit down at a quiet table free from distraction Make sure to time yourself Complete the practice test s score your test s and thoroughly review the explanations for the questions you answered incorrectly However do not review too much during any one sitting Concentrate on one problem area at a time by reviewing the question and explanation and by studying our review s until you are confident that you completely understand the material Since you will be allowed to write in your test booklet during the actual exam you may want to write in the margins and spaces of this book when practicing However do not make miscellaneous notes on your answer sheet Mark your answers clearly and make sure the answer you have chosen corresponds to the question you are answering Keep track of your scores This will enable you to gauge your progress and discover general weaknesses in particular sections You should carefully study the reviews that cover the topics causing you difficulty as this will build your skills in those areas To get the most out of your studying time we recommend that you follow the Study Schedule It details how you can best budget your time

**TEST TAKING TIPS** Although you may be unfamiliar with tests such as the Advanced Placement exams there are many ways to acquaint yourself with this type of examination and help alleviate your test taking anxieties Listed below are ways to help yourself become accustomed to the AP exam some of which may also be applied to other standardized tests Become comfortable with the format of the AP Examination in Statistics When you are practicing to take the exam s simulate the conditions under which you will be taking the actual test s You should practice under the same

time constraints as well Stay calm and pace yourself After simulating the test only a couple of times you will boost your chances of doing well and you will be able to sit down for the actual test much more confidently Know the directions and format for each section of the exam Familiarizing yourself with the directions and format of the different test sections will not only save you time but will also ensure that you are familiar enough with the AP exam to avoid anxiety and the mistakes caused by being anxious Work on the easier questions first If you find yourself working too long on one question make a mark next to it in your test booklet and continue After you have answered all of the questions that you can go back to the ones you have skipped Use the process of elimination when you are unsure of an answer If you can eliminate three of the answer choices you have given yourself a fifty fifty chance of getting the item correct since there will only be two choices left from which to make a guess If you cannot eliminate at least three of the answer choices you may choose not to guess as you will be penalized one quarter of a point for every incorrect answer Questions not answered will not be counted Be sure that you are marking your answer in the oval that corresponds with the correct item in the test booklet Since the multiple choice section is graded by machine marking the wrong answer will throw off your score

**Proceedings of the Section on Statistical Education** American Statistical Association. Section on Statistical Education,1998 **CPA Examination Review** Patrick R Delaney, PH.D., CPA,Patrick R. Delaney,1992-12 Understanding Basic Statistics Charles Henry Brase,Corrinne Pellillo Brase,2001 Designed specifically to present the core topics offered in a one semester statistics course without overwhelming introductory students Understanding Basic Statistics 2 e includes material on descriptive statistics probability estimation and hypothesis testing with clear early coverage of linear regression Carefully chosen problems throughout the text drawn from a variety of disciplines and labeled for easy access enable students to use real data to draw conclusions and interpret results Working through high interest relevant exercises students are encouraged to apply their knowledge and to see how statistics affects their daily lives The authors carefully guide students through the material with step by step instructions guided exercises and technology tips and a wealth of supplements print software and video enhances both teaching and learning ViewPoints brief essays presenting diverse situations in which statistics are used appear before each section problem set Many of these essays refer students to a web site for further exploration The text is available with the student version of Minitab software as well as with a text specific ComputerStat disk Students learn the power and efficiency of manipulating large sets of imported data analyzing the information and interpreting the results Using Technology Sections featuring a variety of data for analysis using a computer software program or a graphing calculator include screen displays from Minitab and the TI 83 calculator ComputerStat and new material on Excel Additional features include Guided Exercises with completely worked out solutions Linking Concepts writing exercises DataHighlights group projects and Calculator Notes
