

Shuffle the Deck

A pharmaceutical company is testing a new drug for diabetes patients. Due to various side-effects, they start with a very small sample, ten subjects for their first trial. The subjects take the medication with their evening meal. After the meal they test their blood sugar (mg/dL). The hope is that the blood sugar levels will be lower with the new medication. Five subjects were kept in a control group and five took the medication, randomly assigned. Here are the data.

treatment	185	163	125	151	101
control	190	175	178	135	201

Make ten slips of paper (3x5 cards work well) with each of the ten blood sugar levels written on them. Shuffle. Randomly assign five cards to the treatment group and five to control. Calculate the mean difference between the groups. Repeat. 25 times!

1.

Graph the mean differences you obtained. You should have 25 such differences. Indicate on the graph the difference from the actual experiment lies.

2.

What do you conclude? Is the difference observed in the experiment one that could have happened by random chance? Or does it appear that the difference is unusual and was due to the medication being administered to the five subjects?

Ap Statistics Esp Investigative Task Answer:

An Introduction to Parapsychology, 5th ed. Harvey J. Irwin, Caroline A. Watt, 2007-03-07 This is a thoroughly updated and revised edition of our highly acclaimed university textbook on the science of parapsychology. The objective of this book is to provide an introductory survey of parapsychologists' efforts to explore the authenticity and bases of anomalous apparently paranormal phenomena. It outlines the origins of parapsychological research and critically reviews investigations of extrasensory perception, psychokinesis, poltergeist phenomena, near-death and out-of-body experiences, and the evaluation of parapsychology as a scientific enterprise. Instructors considering this book for use in a course may request an examination copy here.

Accepted for Higher Degrees by the Universities of Great Britain and Ireland and the Council for National Academic Awards, 2006 **The Star Gate Archives** Edwin C. May, Sonali Bhatt Marwaha, 2018-11-02 Star Gate is the largest funded program in the history of psi research, receiving about 19.933 million in funding from 1972 to 1995. Researchers from SRI International and later at Science Applications International Corporation in association with various U.S. intelligence agencies participated in this program. Using the remote viewing method, research focused on understanding the applicability and nature of psi in general but mostly upon informational psi. Volume 1: Remote Viewing 1972-1984 and Volume 2: Remote Viewing 1985-1995 include all aspects of RV, including laboratory trials and several operational results. Volume 3 focuses on laboratory investigations on psychokinesis. Volume 4: Operational Remote Viewing. Government Memorandums and Reports includes an analysis of the applied remote viewing program and a selection of documents that provide a narrative on the behind-the-scenes activities of Star Gate. In a total of 504 separate missions from 1972 to 1995, remote viewing produced actionable intelligence, prompting 89% of the customers to return with additional missions. The Star Gate data indicate that informational psi is a scientifically valid phenomenon. These data have led to the development of a physics and neuroscience-based testable model for the underlying mechanism, which considers informational psi as a normal, albeit atypical, phenomenon. The Star Gate data found insufficient evidence to support the causal psi-psychokinesis hypothesis.

Cumulated Index Medicus, 1992 **An Introduction to Parapsychology** Harvey J. Irwin, 1989 Reviews of earlier editions: Excellent, comprehensive, well-written, high-quality, recommended for public, college, and university libraries. Choice highly recommended. Give s an intelligent overview; clear organization is excellent. The Journal of Parapsychology fills the gap because it is up-to-date, formally written, and wide in scope, a particularly useful resource for students and teachers alike as a textbook. Irwin's book is the best of its kind. Journal of the American Society for Psychical Research, an invaluable source book for students and would-be students of parapsychology, highly recommended.
