Engaging Undergraduates in Publishable Research: Best Practices Traci A. Giuliano, Jeanine L. M.

Skorinko, Marianne Fallon, 2019-11-20 Although many articles and books have been written about conducting research with undergraduates there is a dearth of research on the process of publishing with undergraduates. Thus in this research topic we assembled a collection of 43 articles from 98 researchers worldwide who are passionate about and have had success in publishing high quality peer reviewed journal articles with undergraduates. The diverse articles represent a wide range of practices to help researchers publish with undergraduates including structuring the curriculum to promote undergraduate research and publication, optimizing research experiences for undergraduates, training students in implementing advanced techniques, assessing special populations or conducting research in off campus settings, addressing institutional and career challenges for faculty and increasing inclusion and diversity. Each article provides a unique and diverse perspective that nevertheless resonates across contexts and situations. We hope that the ideas, models, techniques and practices in these articles will motivate and inspire readers to begin, continue or rethink how they engage undergraduates in publishable research. We also hope to stimulate empirical and quantitative research on the effectiveness of these ideas, models, techniques and practices.

[Nursing and Midwifery Research - E-Book](#) Dean Whitehead, Daniel Terry, 2024-09-01 An indispensable guide to understanding, applying and conducting research in practice. It is essential that nurses and midwives are able to understand, interpret, synthesise and apply research for effective practice. Nursing and Midwifery Research is a well-established, highly regarded and comprehensive resource that covers all the key fundamentals needed to become and be an evidence-based practitioner. This book provides an accessible and user-friendly roadmap of the entire research journey from the conception of a research idea or question through to planning, implementation, evaluation and dissemination of findings. Readers will develop strong skills in research literacy and critical appraisal and thus build confidence to embark on research projects of their own, an aim of developing research awareness and knowledge. Written by research experts in their fields specifically for undergraduate and postgraduate students and clinicians in Australia and New Zealand and fully updated in its seventh edition, this book is a perfect introduction and long-term resource to support research methods and evidence-based practice throughout their professional careers.
