

1 Inspect/Place

Inspect the following items and install the unit:

- User's Manual
- Safety Manual
- Warranty Registration Card

Notes the weather if placing in the unit on an outdoor floor or overcast surface, to avoid moisture damage.

Place the UPS:

- Provide 5 cm clearance on the top and sides for adequate airflow around the unit.
- Avoid direct sunlight.
- Avoid moisture heat.
- Avoid moisture humidity or liquids.
- Avoid excessive dust.

3 Power On

Press the ON/OFF switch to power the unit ON.

A single short beep and the green "Power On" indicator confirms that Back-UPS ES is on and ready to provide protection.

The Back-UPS ES shows a charge for at least 10 hours to ensure sufficient runtime. The unit is being charged whenever it is connected to a utility power.

2 Connect Equipment

Plug the Back-UPS ES power cord directly into a wall outlet, not a surge protector or power strip.

Battery Back-up plus ⚡ **Surge Protection**

These outlets are powered whenever the Back-UPS ES is powered ON. During a power out or other utility problems (low and high voltages), these outlets will be powered for a limited time by the Back-UPS ES. Plug your computer and monitor into these outlets.

Surge Protection Only

This outlet provides surge protection from surges even if the Back-UPS ES is switched OFF. Plug your printer, fax machine, scanner or other peripheral that does not need battery power into this outlet.

Status Indications

The Back-UPS ES indicates operating status using a combination of visual and audible indicators.

Visual LED	Audible Indication	Status	Action/Response
Green	None	On-line (UPS is connected to utility power)	None
Amber	4 rapid beeps (10 seconds)	On-Battery (UPS is connected to battery power)	See UPS Operation Manual for details on battery runtime.
Amber	2 rapid beeps (10 seconds)	Low Battery (UPS is connected to battery power and battery is low)	See UPS Operation Manual for details on battery runtime.
Amber Flashing	None	Overload (UPS is connected to utility power and is overloaded)	See UPS Operation Manual for details on overload protection.
Red	None (or 2 rapid beeps 10 seconds)	Battery Failure (UPS is connected to battery power and battery is failing)	See UPS Operation Manual for details on battery failure.
Red	2 rapid beeps (10 seconds)	Overcharge (UPS is connected to utility power and is overcharging)	See UPS Operation Manual for details on overcharge protection.

See the Troubleshooting section for additional assistance.

Order Replacement Battery

Replace with an APC qualified battery. Replacement batteries can be ordered from APC (United States), Powerware (Canada), or Powerware (Europe). Have your Back-UPS ES model number available when ordering. Your model number can be found on the bottom of the unit.

Transfer Voltage and Sensitivity Adjustment

In situations where the Back-UPS or connected equipment appears to be sensitive to input voltage, it may be necessary to adjust the transfer voltage. This is very simple and requires use of top panel Pushbutton. To adjust the transfer voltage proceed as follows:

1. Plug the Back-UPS into the utility power source. The Back-UPS will be in a standby mode via indicators (LED).
2. Press the Top panel pushbutton fully inward for 30 seconds. The LED will start glowing in a cycle order: GREEN - AMBER - RED - GREEN, indicating going in to programming mode.
3. The Back-UPS will then indicate the current sensitivity as shown in following table.

Indicator Flashing (Visual Indication)	Sensitivity Setting	Input Voltage Range (Per Utility Requirement)	Use when
GREEN Flashing	Low	100 - 130V	Input voltage is consistently low or high. Recommended for use in areas with low or high voltage fluctuations.
AMBER Flashing (Default)	Medium	100 - 130V	Back-UPS operates properly.
Red Flashing	High	100 - 130V	Extremely sensitive to input voltage fluctuations (over-voltage).

4. To select the Low Sensitivity setting, Press the push button until the LED turns to GREEN Flashing.
5. To select the Medium sensitivity setting, Press the push button until the LED turns to AMBER Flashing.
6. To select the High sensitivity setting Press the Push button until the LED turns to RED Flashing.
7. The unit will exit from programming mode automatically after the sensitivity selection is done. The LED will start glowing in cycle order GREEN-AMBER-RED twice indicating the Exit from the programming mode.
