**Encyclopedia of the Sciences of Learning** Norbert M. Seel, 2011-10-05 Over the past century educational psychologists and researchers have posited many theories to explain how individuals learn i e how they acquire organize and deploy knowledge and skills The 20th century can be considered the century of psychology on learning and related fields of interest such as motivation cognition metacognition etc and it is fascinating to see the various mainstreams of learning remembered and forgotten over the 20th century and note that basic assumptions of early theories survived several paradigm shifts of psychology and epistemology Beyond folk psychology and its na ve theories of learning psychological learning theories can be grouped into some basic categories such as behaviorist learning theories connectionist learning theories cognitive learning theories constructivist learning theories and social learning theories Learning theories are not limited to psychology and related fields of interest but rather we can find the topic of learning in various disciplines such as

philosophy and epistemology education information science biology and as a result of the emergence of computer technologies especially also in the field of computer sciences and artificial intelligence As a consequence machine learning struck a chord in the 1980s and became an important field of the learning sciences in general As the learning sciences became more specialized and complex the various fields of interest were widely spread and separated from each other as a consequence even presently there is no comprehensive overview of the sciences of learning or the central theoretical concepts and vocabulary on which researchers rely The Encyclopedia of the Sciences of Learning provides an up to date broad and authoritative coverage of the specific terms mostly used in the sciences of learning and its related fields including relevant areas of instruction pedagogy cognitive sciences and especially machine learning and knowledge engineering This modern compendium will be an indispensable source of information for scientists educators engineers and technical staff active in all fields of learning More specifically the Encyclopedia provides fast access to the most relevant theoretical terms provides up to date broad and authoritative coverage of the most important theories within the various fields of the learning sciences and adjacent sciences and communication technologies supplies clear and precise explanations of the theoretical terms cross references to related entries and up to date references to important research and publications The Encyclopedia also contains biographical entries of individuals who have substantially contributed to the sciences of learning the entries are written by a distinguished panel of researchers in the various fields of the learning sciences Digital Endocasts Emiliano Bruner, Naomichi Ogiwara, Hiroki C. Tanabe, 2017-12-28 This book is dedicated to a specific component of paleoneurology probably the most essential one endocasts A series of original papers collected here focuses on describing methods and techniques that are dedicated to reconstruct and study fossil endocasts through computed tools The book is particularly oriented toward hominid paleoneurology although it also includes chapters on different taxa to provide a more general view of current perspectives and problems in evolutionary neuroanatomy The first part of the book concerns techniques and tools to cast endocranial anatomy The second part deals with computed morphometrics and the third part is devoted to comparative neurobiology Those who want to approach the field in general terms will find this book especially helpful as will those researchers working with endocranial anatomy and brain evolution The book will also be useful for researchers and graduate students in anthropology bioarchaeology medicine and related fields *The Oxford Handbook of Causal Reasoning* Michael Waldmann, 2017 The Oxford Handbook of Causal Reasoning offers a state of the art review of one of our most central cognitive competencies which has for a long time been neglected in cognitive psychology This Handbook provides introductions of competing theories of causal reasoning and discusses its role in various cognitive functions and domains **The Routledge Handbook of Philosophy of Animal Minds** Kristin Andrews, Jacob Beck, 2017-07-06 While philosophers have been interested in animals since ancient times in the last few decades the subject of animal minds has emerged as a major topic in philosophy The Routledge Handbook of Philosophy of Animal Minds is an outstanding reference

source to the key topics problems and debates in this exciting subject and is the first collection of its kind Comprising nearly fifty chapters by a team of international contributors the Handbook is divided into eight parts Mental representation Reasoning and metacognition Consciousness Mindreading Communication Social cognition and culture Association simplicity and modeling Ethics Within these sections central issues debates and problems are examined including whether and how animals represent and reason about the world how animal cognition differs from human cognition whether animals are conscious whether animals represent their own mental states or those of others how animals communicate the extent to which animals have cultures how to choose among competing models and explanations of animal behavior and whether animals are moral agents and or moral patients The Routledge Handbook of Philosophy of Animal Minds is essential reading for students and researchers in philosophy of mind philosophy of psychology ethics and related disciplines such as ethology biology psychology linguistics and anthropology *Encyclopedia of Animal Behavior: G-P* Michael D. Breed, Janice Moore, 2010 Entries examine a broad array of different species and behavior patterns using techniques that range from molecular approaches to the study of behavior to analyses of individuals populations species and ecosystems
