Industrial Organization Lynne Pepall, Dan Richards, George Norman, 2014-01-28 Pepall's *Industrial Organization: Contemporary Theory and Empirical Applications* 5th Edition offers an accessible text in which topics are organized in a manner that motivates and facilitates progression from one chapter to the next. It serves as a complete but concise introduction to modern industrial economics. The text uniquely uses the tools of game theory, information economics, contracting issues, and practical examples to examine multiple facets of industrial organization. The fifth edition is more broadly accessible, balancing the tension between making modern industrial analysis accessible while also presenting the formal abstract modeling that gives the analysis its power. The more overtly mathematical content is presented in the *Contemporary Industrial Organization* text aimed at the top tier universities, while this Fifth Edition will be less mathematical, aimed at a wider range of four-year colleges and state universities.

Feature Selection and Enhanced Krill Herd Algorithm for Text Document Clustering Laith Mohammad Qasim Abualigah, 2018-12-18 This book puts forward a new method for solving the text document (TD) clustering problem, which is established in two main stages: i) A new feature selection method based on a particle swarm optimization algorithm with a novel weighting scheme is proposed, as well as a detailed dimension reduction technique in order to obtain a new subset of more informative features with low-dimensional space. This new subset is subsequently used to improve the performance of the text clustering (TC) algorithm and reduce its computation time. The k-mean clustering algorithm is used to evaluate the effectiveness of the obtained subsets. ii) Four krill herd algorithms (KHAs), namely: a) basic KHA, b) modified KHA, c) hybrid KHA, and d) multi-objective hybrid KHA, are proposed to solve the TC problem. Each algorithm represents an incremental improvement on its predecessor. For the evaluation process, seven benchmark text datasets are used with different characterizations and complexities. Text document (TD) clustering is a new trend in text mining in which the TDs are separated into several coherent clusters where all documents in the same cluster are similar. The findings presented here confirm that the proposed methods and algorithms delivered the best results in comparison with other similar methods to be found in the literature.
