Safety Standards	Listed to UL 98B, CAN/CSA-C22.2 No. 104-20 - Humidifiers

Capacity based on 100°F plenum and 70°F water temperature

SPECIFICATION

720 Series

Fan-Powered Evaporative Humidifier

MODELS:
720AC with Automatic Humidistat
720MC with Manual Humidistat

PRINCIPLE OF OPERATION

The AprilAire Model 720 Fan-Powered Evaporative Humidifier delivers maximum moisture output with superior water efficiency for ducted HVAC systems. When the humidifier control signals that humidity is low, water and air flow into the HydroCore™ where natural evaporation occurs. Increased output and water conservation are realized with water recirculation technology. The humidifier fan returns humidified air back to the duct where your HVAC system can distribute humidity throughout the home. The Model 720 utilizes water for both evaporation and the removal of solids left behind during the evaporation process. Installing on softened water is recommended. Water may or may not be noticed in the drain line due to the improved efficiency. Once humidity levels are reached, unused water is sent down the drain to prevent standing water from being retained. It is normal to notice a small surge of water in the drain line for this brief event. This is crucial to help flush away trouble-causing mineral deposits and prolong time between service intervals.
