Iida, 2025-02-14 Drawing on a total of 8 308 haiku poems written by 834 English as a foreign language (EFL) university students in Japan, this book explores the value, possibility, and potential of teaching and researching English language haiku in second and foreign language (SFL) contexts. The book showcases how haiku is used and taught in the SFL classroom and discusses how the task of reading and writing English language haiku promotes SFL learning. More specifically, it addresses these questions: What are the textual features of English language haiku produced by EFL students? How do EFL students read and interpret English language haiku? What knowledge and skills do EFL students gain through the task of reading and writing English language haiku? What are the perceptions and attitudes of EFL students in relation to the task of reading and writing haiku in the English classroom? How can English language haiku be used as a research methodology? With empirical evidence from both quantitative and qualitative data, this book moves the field forward by addressing the methodological and pedagogical issues in relation to the use of poetry writing in SFL teaching and learning. The uniqueness of this book lies in its applicability and practicality both in methodological and pedagogical approaches to haiku writing that students, researchers, and teachers in applied linguistics can replicate in diverse teaching contexts. **Elementary English**, 1971 SCC library has

Hochman, Natalie Wexler, 2017-07-27 Why you need a writing revolution in your classroom and how to lead it. The Writing Revolution (TWR) provides a clear method of instruction that you can use no matter what subject or grade level you teach. The model, also known as The Hochman Method, has demonstrated over and over that it can turn weak writers into strong communicators by focusing on specific techniques that match their needs and by providing them with targeted feedback. Insurmountable as the challenges faced by many students may seem, The Writing Revolution can make a dramatic difference. And the method does more than improve writing skills. It also helps boost reading comprehension, improve organizational and study skills, enhance speaking abilities, and develop analytical capabilities. The Writing Revolution is as much a method of teaching content as it is a method of teaching writing. There is no separate writing block and no separate writing curriculum. Instead, teachers of all subjects adapt the TWR strategies and activities to their current curriculum and weave them into their content instruction. But perhaps what's most revolutionary about the TWR method is that it takes the mystery out of learning to write well. It breaks the writing process down into manageable chunks and then has students practice the chunks they need repeatedly while also learning content.
