Reading in the Mathematics Classroom Cyrus F. Smith, Henry S. Kepner, 1981 The concept that it is important for students to learn how to read the language of mathematics is promoted. Most mathematics teachers neither have the knowledge nor feel the responsibility to develop reading skills in their students. The materials in this document are viewed to be of sufficient variety and potential for making important improvements in mathematics classrooms. The teaching ideas are based on the well accepted notion that learning results from interest in a subject. Providing that interest through readiness is considered the key. Individual chapter titles are 1 The Reading Phase of Mathematics 2 The Instructional Framework 3 The Structured Overview 4 The Development of Mathematics Vocabulary 5 The Dilemma of Word Problems 6 The Readability of Mathematics Materials and 7 Concluding Remarks. Additional Mathematics Reading Resources Teacher Focus Recreational Supplementary Resources Student Focus and References are found at the conclusion of the document.
