The Interwar World Andrew Denning, Heidi J.S. Tworek, 2023-08-29 The Interwar World collects an international group of over 50 contributors to discuss, analyze, and interpret this crucial period in twentieth century history. A comprehensive understanding of the interwar era has been limited by Euro American approaches and strict adherence to the temporal limits of the world wars. The volume's contributors challenge the era's accepted temporal and geographic framings by privileging global processes and interactions. Each contribution takes a global thematic approach integrating world regions into a shared narrative. Three central questions frame the chapters. First, when was the interwar? Viewed globally, the years 1918 and 1939 are arbitrary limits and the volume explicitly engages with the artificiality of the temporal framework while closely examining the specific dynamics of the 1920s and 1930s. Second, where was the interwar? Contributors use global history methodologies and training in varied world regions to decenter Euro American frameworks, engaging directly with the usefulness of the interwar as both an era and an analytical category. Third, how global was the interwar? Authors trace accelerating connections in areas such as public health and mass culture, counterbalanced by processes of economic protectionism, exclusive nationalism, and limits to migration. By approaching the era thematically, the volume disaggregates and interrogates the meaning of the global in this era. As a comprehensive guide, this volume offers overviews of key themes of the interwar period for undergraduates while offering up-to-date historiographical insights for postgraduates and scholars interested in this pivotal period in global history.

The 2014 Israel-Gaza Conflict.

Self-Defence or Atrocities in Gaza? Elise Verdonck,2014-11-19 Essay from the year 2014 in the subject Politics Region Near East Near Orient University of Auckland course International Peace Security language English abstract International law historically originates from the need to stabilise relations between people and states To this day one of its most classic functions remains ensuring the peaceful coexistence between states Global history is featured by conflicts between states and even today there is no shortage of disputes Besides principles of demarcation of territories and jurisdictions between states the international law developed a wide range of techniques to resolve conflicts Two of the major sub branches of international law in this context are the ius ad bellum and the ius in bello The former is concerned with the law that governs the use of force whereas the latter deals with the conduct of the armed conflict itself The legal abolishment of war was introduced by the United Nations hereafter UN Nonetheless according to the Charter of the United Nations of 24 October 1945 hereafter UN Charter self defence can serve as a justification for the use of force when certain conditions are met article 51 Since the Second World War the face of armed conflicts changed inter state conflicts have receded significantly in favour of new wars in which non state actors play the leading role Non state actors are individuals or organisations that have a significant political influence but are not allied to any particular state Since the 9 11 attacks the legality of self defence against private violence i e violence of non state actors has become a major question in the international ius ad bellum debate While during the Cold War the state paradigm dominated and states generally held on to a certain form of state involvement in case of a terrorist attack today it seems that the international community no longer has principle objections to the exercise of self defence against non state actors even if the initial attack cannot be attributed to a state As a response to the proliferation and rise of non state actors attempts to stretch the limits of the definition of self defence to include attacks by non state actors can be witnessed The Israel Gaza conflict one of the most complicated ongoing international conflicts with non state actors has as a part of state practice also contributed in the evolving standard of the right of self defence

Essays on War in International Law C. J. Greenwood,2006 The essays contained in this volume deal both with the law concerning resort to force jus ad bellum and the law which regulates the conduct of hostilities once the decision to resort to force has been taken jus in bello The collection looks at Iraqi invasion of Kuwait in 1990 and shift towards the interpretation of decisions of the Security Council rather than the reliance on the law of self defence in assessing the legality or illegality of a state s resort to force Also addressed are questions of whether international law permits the pre emptive use of force and humanitarian intervention The collection also contributes to the debates surrounding the law on the conduct of hostilities the laws of war properly so called including intense debate over whether nuclear weapons could ever lawfully be employed whether there is a role for belligerent reprisals in modern international law the system for the prosecution of war crimes and
