world has witnessed the development and use of increasingly complex and powerful military systems and technologies In the  
process the art of war has truly become the art of combined arms warfare in which infantry artillery air support intelligence  
and other key elements are all coordinated for maximum effect Nowhere has this trend been more visible than in the history  
of twentieth century warfare Originally published as an essential in house study for U S Army officers during the 1980s this  
much revised and expanded edition remains the most complete study available on the subject Rewritten with a much wider  
readership in mind it both retains its enormous practical utility for military professionals and provides a valuable and  
appealing introduction for scholars and general readers Jonathan House author of the original work brings the story of  
combined arms up to the present covering among other things Desert Storm the war in Chechnya and the rise of smart  
weapons and related technologies He traces the evolution of tactics weapons and organization in five major militaries  
American British German Russian and French over 100 years of warfare Revealing both continuities and contrasts within and  
between these fighting forces he also provides illuminating glimpses of Israeli and Japanese contributions to combined arms  
doctrine Expanding his insightful analysis of the world wars and the wars in Korea and Vietnam House also offers much new  
material focused on the post Vietnam period Throughout he analyzes such issues as command and control problems of highly  
centralized organizations the development of special operations forces advances in weapons technology including ballistic  
and anti ballistic missile systems the trade offs involved in using heavy versus light armed forces and the enduring obstacles  
to effective cooperation between air and land forces His strong critique of the air superiority propaganda that came out of  
the Gulf War is sure to spark some heated debates Rigorously comparative House s study addresses significant questions  
about how nations prepare for war learn or don t learn its harsh lessons and adapt to changing times and technologies  
Unique in the annals of the literature on warfare it will be the standard work on this subject for a long time to come
