tasks. This does not mean however that carrying out SOPs never requires thought or that SOPs should never change. Indeed tactical units must change some operating procedures as rapidly as operational environments and missions change. The SOP portal helps units avoid an unnecessary loss of effectiveness that could occur by maintaining unthinking dependence on outdated written procedures. The portal also helps units avoid a loss of effectiveness that could occur when units delay writing down processes that need to become standardized. The doctrine in this manual provides techniques for developing unit tactical SOPs. Units throughout the Army can take advantage of technology to obtain guidance, collaborate in real time and find information quickly. This manual and the SOP portal are intended to enhance operational adaptability Army wide. In the short term the information in the SOP portal will help units establish or improve SOPs more rapidly. In the long term the intention is that more and more units will build SOPs using the portal and the doctrine in this manual. SOPs throughout the Army should increase in similarity as the combination of doctrinal guidance and Army wide milWiki collaboration facilitates consensus.
