A nurse is caring for a client who has a percutaneous endoscopic gastrostomy (PEG) tube and is receiving intermittent feedings. Prior to initiating the feeding, which of the following actions should the nurse take first?

- A. Flush the tube with water.
- B. Place the client in semi-Fowler's position.**
- C. Cleanse the skin around the tube site.
- D. Aspirate the tube for residual contents. - **Ans-B. Place the client in semi-Fowler's position.**

A nurse is caring for a client who is scheduled to undergo an esophagogastroduodenoscopy (EGD). The nurse should identify that this procedure is used to do which of the following?

- A. To visualize polyps in the colon**
- B. To detect an ulceration in the stomach
- C. To identify an obstruction in the biliary tract
- D. To determine the presence of free air in the abdomen - **Ans-A. A sigmoidoscopy or barium enema is used to visualize the lower gastrointestinal tract, where polyps are found.**
- B. CORRECT: An EGD is used to visualize the esophagus, stomach, and duodenum with a lighted tube to detect a tumor, ulceration, or obstruction.**
- C. Identifying an obstruction in the biliary tract is performed during endoscopic retrograde cholangiopancreatography (ERCP).
- D. The measurement of free air, which is a gas, is obtained using fluoroscopy or an x-ray, not an EGD.

A nurse is teaching a client who has Barrett's esophagus and is scheduled to undergo an esophagogastroduodenoscopy (EGD). Which of the following statements should the nurse include in the teaching?

meaning in their professional commitment and will train others to do the same. The mentorship program is the ticket to success that many students need to complete their degree program, prevent burnout, pass the nursing NCLEX examination, and remain in the workforce after graduation. The current attrition rate in baccalaureate nursing programs is 25-50% as is the attrition rate in the first 2 years of employment of new RNs entering the workforce. Burnout is due to a lack of care and support for helping the students navigate the rigor and demands of the nursing program. Creating a community of learners with caring and support creates an environment that fosters academic engagement and success. The unique aspect of this book is its focus on creating a caring environment to support the students helping them develop caring skills, empathy, resilience, and their own self care, developing the skills for success beyond their educational process into the workforce. This book integrates all patterns of knowing personal aesthetic, empiric, and ethical, and provides the missing link of peer mentorship necessary to the development of resilient, emancipated nursing students and graduates capable of working in community with others to establish cultures of care in health care. This is a must have resource for transformation of nursing education in the next century.
