# American Flag Kindergarten

**Maria Figueroa (Graduate student)**

## **American Flag Kindergarten:**

**Children's Knowledge, Beliefs and Feelings about Nations and National Groups** Martyn Barrett, 2013-04-15 This book provides a state of the art account of how people's subjective sense of national identity and attitudes towards countries and national groups develop through the course of childhood and adolescence. It offers a comprehensive review of the research which has been conducted into children's understanding of nations as geographical territories and as political, historical and cultural communities, children's knowledge, beliefs and feelings about the people who belong to different national groups, children's attitudes towards and emotional attachment to their own country and national group. The authors elaborate on the developmental patterns that have been found to emerge, contextualized by a consideration and evaluation of the theoretical frameworks which can be used to explain these patterns. Written by the leading international authority in this field and reporting in collaboration with his colleagues the findings from two major transnational research projects, this book will be invaluable to postgraduate students and researchers working in this field. The book will also be of great benefit to undergraduate students taking courses in Developmental Psychology, the Sociology of Childhood and Education.

*Development of the Concept of Flag in Children of Kindergarten and Grade School Age* Eugene A. Weinstein, 1951

*Kindergarten Review*, 1894      **Playing with Patriotism** Maria Figueroa (Graduate student), 2016 The current study explored the utility of a workshop for early childhood educators on the topic of patriotic symbols. Fifteen first and second year graduate students from the Master of Arts in Early Childhood Education program at California State University Northridge participated with a pre and post workshop test. Overall the participants had a wide range of ideas about national symbols in the pre test, citing values and beliefs of the home country in addition to birds, flowers and the flag. The participants also cited the role of history and geography as interwoven into patriotic symbols. Results in the post test revealed that participants tended to focus on the specifics from the workshop itself, including a strong emphasis on the American flag. Overall the workshop was rated very useful with a score of 4.5 out of 5.5 (excellent). The content of the workshop earned 4.5, slide quality earned 4.3, presenter quality was rated 4.7 and the overall rating earned a 4.5.      *Red, White, and Blue* John Herman, 1998

Describes how the American flag came into being, how it has changed over the years, and its importance as the symbol of our country.

*The Urban School* Christian Karner, 2017-09-29 Americans worry continually about their schools with frequent discussions of the crisis in American education, of the failures of the public school systems and of the inability of schools to meet the current challenges of contemporary life. Such concerns date back at least to the nineteenth century. A thread that weaves its way through the critiques of American elementary and secondary schools is that the educational system is not serving its children well; that more should be done to enhance achievement and higher performance. These critiques first began when the United States was industrializing and were later amplified when the Soviets and Japan were thought to be grinding down the competitive position of America. At the start of the twenty-first century, as we discuss globalization and

maintaining our leadership position in the world economy they are being heard again The Urban School A Factory for Failure challenges these assumptions about American education Indeed a basic premise of the book is that the American school system is working quite well doing exactly what is expected of it To wit that the schools in the United States affirm reflect and reinforce the social inequalities that exist in the social structures of the society Stated differently the schools are not great engines for equalizing the existing social inequalities Rather they work to reinforce the social class differences that we have had in the past and continue to have in more pronounced ways at present Rist uses both sociological and anthropological methods to examine life in one segregated African American school in the mid western United States A classroom of some thirty children were followed from their first day of kindergarten through the second grade Detailed accounts of the day by day process of sorting stratifying and separating the children by social class backgrounds demonstrates the means of ensuring that both the poor and middle class students soon learned their appropriate place in the social hierarchy of the school Instructional time discipline and teacher attention all varied by social class of the students with those at the bottom of the ladder consistently receiving few positive rewards and many negative sanctions When The Urban School was first published in 1973 the National School Boards Association called it one of the ten most influential books on American education for the year It remains essential reading for educators sociologists and economists The Kindergarten Guide: an Illustrated Hand-book Designed for the Self-instruction of Kindergartners, Mothers and Nurses Maria Kraus-Bøelte, John Kraus, 1878 *The Kindergarten and First Grade*, 1923 The Kindergarten Guide ... for the Self-instruction of Kindergartners, Mothers, and Nurses Maria Kraus-Boelté, 1881 **The Urban School** Christian Karner, 2017-09-29 Americans worry continually about their schools with frequent discussions of the crisis in American education of the failures of the public school systems and of the inability of schools to meet the current challenges of contemporary life Such concerns date back at least to the nineteenth century A thread that weaves its way through the critiques of American elementary and secondary schools is that the educational system is not serving its children well that more should be done to enhance achievement and higher performance These critiques first began when the United States was industrializing and were later amplified when the Soviets and Japan were thought to be grinding down the competitive position of America At the start of the twenty first century as we discuss globalization and maintaining our leadership position in the world economy they are being heard again The Urban School A Factory for Failure challenges these assumptions about American education Indeed a basic premise of the book is that the American school system is working quite well doing exactly what is expected of it To wit that the schools in the United States affirm reflect and reinforce the social inequalities that exist in the social structures of the society Stated differently the schools are not great engines for equalizing the existing social inequalities Rather they work to reinforce the social class differences that we have had in the past and continue to have in more pronounced ways at present Rist uses both sociological and anthropological methods to

examine life in one segregated African American school in the mid western United States A classroom of some thirty children were followed from their first day of kindergarten through the second grade Detailed accounts of the day by day process of sorting stratifying and separating the children by social class backgrounds demonstrates the means of ensuring that both the poor and middle class students soon learned their appropriate place in the social hierarchy of the school Instructional time discipline and teacher attention all varied by social class of the students with those at the bottom of the ladder consistently receiving few positive rewards and many negative sanctions When *The Urban School* was first published in 1973 the National School Boards Association called it one of the ten most influential books on American education for the year It remains essential reading for educators sociologists and economists *Kindergarten and First Grade* ,1925 **The**

**Guide** Maria Kraus-Boelté,John Kraus,1881 **The Kindergarten Magazine** ,1904 **The Kindergarten-primary Magazine** ,1931 **Children and Society** Gerald Handel,Spencer Cahill,Frederick Elkin,2007 *Children and Society* presents a comprehensive sociological portrayal of children and childhood from birth to the beginning of adolescence A major theme is the tension between children s active agency and the socializing influences of the family school peer groups and mass media The book incorporates the most recent research and theories of childhood socialization Its theoretical perspective is primarily symbolic interactionism which emphasizes the development of the self The volume features research that documents cultural variations within American society shaped by social class race and ethnicity and gender *Children and Society* is organized into four parts each with an introduction Part I Understanding Childhood Socialization consists of four chapters Chapter One reviews how social scientists have conceptualized children leading to today s understanding of childhood as a social construction Chapter Two briefly discusses the characteristics of the human organism that both require and make socialization possible and the characteristics of society that receives the newborn Chapter Three reveals the range of meaning of the concept of socialization in western and non western societies and includes a review of the history of western childhoods Chapter Four offers a careful exposition of the development of the self Part II Agencies of Socialization focuses on the major agencies that help shape the development of the self in the United States and similar societies One chapter each covers families schools peer groups and mass media respectively Diversities of Socialization are the focus of Part III Whereas Chapter Four presented a general account of how the self develops the three chapters of Part III examine

the variations that are shaped by social class race ethnicity and neighborhood and gender The single chapter in Part IV Looking Back and Looking Ahead stresses that socialization is a life long process It briefly sketches issues of continuity and discontinuity in socialization throughout adolescence adult life old age and death *The School Journal* ,1900
