

APES Free-Response Questions Guide

OVERVIEW

You have 90 minutes to write 4 essays of equal value (10 points each). This gives you a little over 22 minutes for each essay. Count on 20 minutes to read and write the essay and 2 minutes to edit what you have written. Make sure to read each question thoroughly and make sure you understand all of its parts. The rubric for each question is set up to contain more than 10 points (11-13), but you can only earn a maximum of 10 points on any one question. Start with the essay that you deem the easiest first. The four questions usually fall into three categories:

One will involve that Analysis of a Data Set (calculators not allowed!).

One will involve a Document-Based Question. You will read a document and answer question based on the information in that document as well as expand on it based on your general knowledge.

Two will involve a Synthesis and Evaluation Question. One of these will require you to set up an experiment to show a particular effect.

THINGS TO DO

1. Before answering any questions

- Read the question twice.
- Underline what the question is asking for; answer the question(s) asked and only those questions. Answer all parts of the question.
- Begin answering the question in the order it is written.

2. Outline the answer on the green booklet to avoid confusion and disorganization. Pay close attention to the verbs used in the directions, such as **describe**, **explain**, **compare**, **give evidence for**, **graph**, **calculate**, **design an experiment**, etc., and be sure to follow those directions. Thinking ahead helps to avoid scratch outs, asterisks, skipping around and rambling.

If the question says to **'discuss'** or **'describe'**

1. Define the topic
2. Describe or elaborate on the topic
3. State an example of that topic

If the question says to **'compare and contrast'**

1. Clearly state what the items have in common
2. Clearly state how items are different

If the question asks a **mathematical** problem

1. Show every single step of all work
2. Set up problems so that labels cancel out (dimensional analysis)
3. Write answers with labels

Speaking of Apes Thomas Albert Sebeok,Donna Jean Umiker-Sebeok,1980-05

Language Learning and Concept Acquisition William Demopoulos,Ausonio Marras,1986 This volume features work on learning by researchers in various disciplines who share an interest in the systematic study of cognition and in the study of the formal and semantic aspects of language acquisition A recurring theme is that language learning involves the acquisition of certain competencies and the formation of a system of beliefs which are significantly underdetermined by the linguistic and nonlinguistic inputs

available to the learner Theories of language learning must confront the epistemological problem of how it is possible to induce and fixate a belief system on the basis of exposure to limited data A typical strategy in dealing with this problem has been to specify various types of formal and empirical constraints on linguistic and conceptual development in terms of specific hypotheses about the character of what is learned and about the kinds of resources and strategies available to the learner Most of the contributions in this volume are concerned with the specification and evaluation of such constraints

The Lying Ape Brian King,2007 We are all natural born liars telling an average of six lies a day So the next time you speak to someone the chances are that you will be lied to In this fascinating new book Brian King unravels the amount of deceit that surrounds us He shows how lies are told by all from the president to your local second hand car salesman and advises on the best techniques for spotting a lie **Teaching Reading, Writing, and Study Strategies** H.
