*Limpopo's Legacy* Anne Heffernan, 2019 Argues that the historical primacy of youth politics in Limpopo South Africa has influenced the production of generations of nationally prominent youth and student activists among them Julius Malema Onkgopotse Tiro Cyril Ramaphosa Frank Chikane and Peter Mokaba Oilseed Cake for Nematode Management Faheem Ahmad, Rakesh Pandey, 2023-07-25 Plant parasitic nematodes PPNs devastate many crop plants causing billions of dollars in agricultural losses each year Effective management methods to combat PPNs are synthetic nematicides but most are non specific and notoriously toxic and threaten the soil ecosystem groundwater and human health The plant by products such as oilseed cakes are sources of bioactive compounds with nematocidal potential Oilseed cakes are an excellent organic fertilizer and their bioactive compounds are now gaining importance as they are safe for the environment This book provides the most comprehensive and up to date review of research on the use of oilseed cakes against PPNs The complete knowledge of better uses of oilseed cakes for nematode management is necessary for developing effective nematode control options to reduce yield loss Key features Describes plant by products such as oilseed cakes and their potential applications Explores bioactive compounds from oilseed cakes for agricultural biofertilization and nematocidal activity Discusses nematode management in vegetable fruit and legume crops Covers the use of oilseed cakes and management of the associated challenges This volume is designed and edited to serve as an invaluable resource text for readers associated with plant nematology plant pathology plant protection and agricultural science including researchers teachers advanced undergraduates and graduate students and even agricultural extension agents and farmers **Enhancing Food Production System Resilience for Food Security Facing a Changing Environment** Liming Ye, Ping Zhu, 2023-11-28 As the dominant source of the human food supply the global land system underlies the foundation of the livelihood and wellbeing of humanity on Earth On the one hand the growth rate in the land system's productive capacity of food has played a key role in global food provision Technological breakthroughs in wheat and rice production during the past few decades for instance have greatly contributed to the maintenance of this growth rate in many parts of the world On the other hand however the terrestrial food production system is facing increasing challenges from environmental stressors ranging from climate change air pollution to land degradation Whether and how the global land system will support the food security of more than 10 billion people in the 21st century while minimizing its environmental footprint remains an open question to debate It is inevitable that the global food production system has to be shifted from focusing on production expansion to land system resilience so that the dual goals of sustainable production and environmental friendliness can be simultaneously achieved *Annual Report* National Research Foundation (South Africa), 2016 **Handbook of Research on Emerging Theories, Models, and Applications of Financial Econometrics** Burcu Adıgüzel Mercangöz, 2021-02-17 This handbook presents emerging research exploring the theoretical and practical aspects of econometric techniques for the financial sector and their applications in economics By

doing so it offers invaluable tools for predicting and weighing the risks of multiple investments by incorporating data analysis Throughout the book the authors address a broad range of topics such as predictive analysis monetary policy economic growth systemic risk and investment behavior This book is a must read for researchers scholars and practitioners in the field of economics who are interested in a better understanding of current research on the application of econometric methods to financial sector data **Integrated Annual Report ...** Broadband Infraco,2016 **Annual Report** South Africa.

Department of Basic Education,2016 *Charcoal, Food, and Water Production in the Tropics: Applying Nexus Thinking to Improve Research and Policy Approaches in Complex Landscapes* Tuyeni Heita Mwampamba,Adrian Ghilardi,Rob Bailis,2020-02-04 Editorial Tuyeni H Mwampamba Rob Bailis Adrian Ghilardi Urbanization food and water consumption trends in many tropical countries show that demand for charcoal as a source of cooking energy meat grain and water will rise to proportions that surpass the ability of existing ecosystems to supply these services simultaneously and at desired qualities Consequently drastic changes to policy and practice are needed to improve ecosystem potential and or alter demand trends Traditional charcoal production in sub Saharan Africa South East Asia and Latin America often competes or co exists with livestock keeping and agriculture and has a tendency to occur in water limited woodlands The co occurrence of charcoal and food production results in complex landscapes characterized by strong interactions between subsystems managed by multiple sets of actors with potentially competing objectives These social ecological systems provide goods and services that are essential to millions of people throughout the global south Nevertheless there have been very few detailed studies of such systems particularly on the individual and combined effects of charcoal crop and livestock production on the hydrological system that maintains them and vice versa As a result these multi use landscapes are typically managed by short sighted highly generalized mono sectorial policies that ignore important tradeoffs and undercapitalize on synergies A system level approach could provide important insights that improve and expand current understanding of this energy food water nexus Tackling urgent and complex problems composed of multiple and interrelated factors lies at the heart of nexus thinking an approach that examines the inter relatedness and interdependencies of environmental resources and their transitions and fluxes across spatial scales and between compartments UNU FLORES 2015 and relies on interdisciplinary research and multi sector policy teams It has attracted significant interest from international organizations the private sector and governments as a way to develop integrated equitable solutions that involve inputs from multiple stakeholders However this approach is notably absent in the research arena Identifying appropriate interventions for achieving sustainable charcoal and food production and maintaining the underlying hydrological system on which they depend requires that the systems are considered simultaneously and that their biophysical social and political inter relations are well understood Taking charcoal as the nexus entry point this Research Topic aims to generate new understanding of charcoal production systems by incorporating agriculture and hydrology into the matrix We were interested in empirical articles reviews meta analytical

articles and perspective papers that address at least two of the three nexus components and which offer provocative and insightful perspectives into the nexus as a whole We hope that this Research Topic will 1 facilitate identification of research gaps policy opportunities and priorities for the nexus 2 kick start the development of a community of researchers and practitioners working on the nexus and 3 permit the development of a research agenda that explores the nexus globally across multiple study sites
